EDITORIAL

Along with Jazza's rantings, there's another dose of that sensationally popular column - Insult Corner, where, without prejudice, more of you readers are mercilessly put down in hilarious fashion. Hal

SUPER NES NEWS SPECIAL

Nintendo has officially announced that the Super NES is all set for release in the UK! Find out all the sordid details in this special news report. Remember, you read it first in MEAN MACHINES!

NEWS

These appropriately named "news" pages are sure to have you perspiring with wild, ecstatic pleasure, as we teasingly reveal all that's new in the zany madcap world of consoles. Those of you suffering from flatulence or incontinence are recommended to remain seated (on the toilet) while reading, to avoid severe social embarrassment.

MEAN YOB

The socially retarded one returns with yet more mind-numbing mail, so it's a veritable insult fest as the YOB gets very angry with a number of very stupid people. You have been warned.

Q+A

WARNING: Such is the question answering brilliance of the man they call Jazza, the weak-willed among you may start to suffer from abnormally frequent intestinal evacuations with more or less fluid discharges. Yuurrgghhh!

TIPS

Yeeessss! Once again MEAN MACHINES comes out tops with a Tips Section so utterly brilliant, it almost defies description. Along with the usual assortment of fab tips, there are Speedball, Klax and Super Kick Off specials. With arousing stuff like that, this section is sure to cause you intense or paroxysmal emotional excitement (if you're old enough).

CHARTS 114

Once more, the MEAN MACHINES crew have spent just over five minutes compiling a list of games that you'll thrill to read over and over again! These pages are so hot, you'll be turning over the page very quickly (for fear of burning your fingers, of course).

THE HOTLINES 98

If you're a bit like Rich (which already rules out well over 99.99% of the population) and use your telephone for plenty of bizarre jargon, you're no doubt the sort of person who phones up these GREAT hotlines in pursuit of FABULOUS console-related prizes! But then, maybe not.

MEGAMART 129

Want to make some money and get rid of some crappy old console gear into the bargain? Well, MEAN MACHINES Megamart is the place for you! It also gives the entire crew a good laugh at the end of an issue as well, for reasons best known to ourselves.

PREVIEWS 140

Yes indeed! The section that's had its look changed more often than Gary's underwear (about twice) is back - and it's choc-a-bloc with details on THE games that'll be adorning your screens very soon! Check it out!

YOB'S GOSSIP 143

Due to popular demand, he's back - the YOB! Once more, he's spreading as much muck as he can, over as large an area as possible. Just who will be publicly humiliated this month?

NEXT MONTH 145

As the saying goes, "Next Month is as Next Month does". Come to think of it, that particular saying is about as informative as the entire Next Month page in general. As usual, there's a fine piece of artwork there to spruce things up a bit, but that's about it!

(C) MEAN MACHINES 1992

Any copying, transmitting or reproduction of this magazine without the express permission of the publishers will result in court action, malarky and much legal fee expenditure, jokers for the guilty party. We'll also smash your face in...

COMETITION RULES
EMAP images employees or their immediate family aren't allowed to enter any of our comps, because it would be unfair if they did. And Dwayne Winston at West Womewood and his family can't enter either, because they've got pus-filled sores on their bottoms which they squeeze into jam jars and keep in their fridge.

JAZZA'S FINAL BIT
Christmas cards are still rolling in - including some particularly tragic ones on tape! Most are completely lacking in the north and originality departments, but there are a few which shine out the jewels in a dung heap. Could your entry be a winner? Or was it chucked into the dustbin with the rest of the crap? All these questions and more will be answered in next month's final bit. Be there, or be a lard-arsed spoon boy.

▲ Mr Wee Willy Winkie, AKA Keith Pentland of Ceithness about to fill his brand new Incontinence pants

A very quick Happy New Year to you all! It's a bit of a short note this month 'cos I'm just about to shoot off. Err. Shoot off to Las Vegas that is. The reason for all this transatlantic malarky is because I'm off to the Winter CES show. There's going to be tons of new stuff on display (including hundreds of new games, new consoles and new CD-ROM technology), so expect a special at-the-show report next month and a full report in the March edition.

▲ Daniel Evans of Newcastle after having 24 lemons shoved up his ass.

▲ Sean Sloan of Doddington: Frankenstein's retarded love child.

▼ Steven of Rulsip and his bizarre "pleasure" toy.

▼ Luke Edwards of Huntingdon: the grinning fedsicle.

▲ What's the definition of vegetable soup? Doug Farnan of Dundee in his bath.

INSULT SPECTACULAR

Once again, loads of pictures have flooded in from readers daring us to insult them. If you reckon you're rock hard enough to stand up to a MEAN MACHINES insult, send in a recent, decent or indecent photo of yourself and if your sad mug is selected, we'll insult you. It's as simple as that. Send your pics to: I'M ONE OF LIFE'S TRAGIC CASES JUST RIPE FOR INSULTING, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGTON LANE, LONDON, EC1R 3AU

▲ Commiserations to Pam of Guisley, Leeds for recently getting engaged to Richard Barker (pictured here), a sad mockery of manhood who makes Karen Carpenter look like the Incredible Hulk.

▲ Stephen Bailey of Maesteg reckons "fat, "four-eyed and chubby" could be used to describe this four year old picture of himself. We'll just settle for "pathetic alaphantine lard-ass".

REAL

▲ It must be a wig that Clint Goodson of North Tuddenham is wearing. Surely even the eaddest, most brain-dead moron wouldn't wear his hair like this.

SUPER FAMICOM GOOD ENOUGH TO EAT

Nintendo have just launched a new console - the edible Super Famicom, which lets you play all your favourite games and then provides you with a meal after you've finished. Actually, we're spinning our chins somewhat. The item in the photo is a cake made Tim Walker and Rupert Grounds of Comberton, Cambridge. Doesn't it look tasty. Mmm-mmmm. Yum, yum, yum. A veritable feast. Feeding of the 5000 here we come.

THE GANG

JULIAN "JAZZA" RIGNALL

Mr casually himself, Jazza has suffered a hairline fracture of his arm having come off his racing bike at 30mph, electrocution (thanks to a broken mains plug), had a brick fall on his head (that explains a lot), a finger sliced to the bone with a scalpel and had a nail go through his foot. And on the rugby pitch he suffered a dislocated left knee, completely torn ligaments in the right knee and severe 4-day concussion after being kicked very hard in the head.

CURRENT FAVE GAMES: JOHN MADDEN'S 92, STAR WARS

RICHARD "SKIDDY CHOPPER" LEADBETTER

It was skid action while Richard was indulging in Chopper fun and frolics that caused his biggest accident. The aforementioned skids were caused by oil patches on the road, and the Chopper in question was his old bike. The end result was a fractured arm and a bent Chopper.

CURRENT FAVE GAMES: ROBOCOD, F-22

RADION "SLICER" AUTOMATIC

When Rad was working in a book distribution warehouse, he managed to cut a very large chunk out of the side of his finger when he was using a razor sharp knife to cut up boxes. "It was horrible", quoth the boy Automatic, "there was a great big bit of flesh on the floor and there was blood spurting everywhere".

CURRENT FAVE GAMES: ROBOCOD, JOE AND MAC, ZELDA III

OZ "SPLAT" BROWNE

"Being conceived" was Osmond's first reply to the question "what's the worst accident or incidents that have befallen you". But when pressed for a less parent-embarrassing answer revealed that he was badly squashed by a car when he was playing hide and seek in the street. "I just ran across the road" says Oz "the next thing I was in hospital". The moral of the story is look before you seek.

CURRENT FAVE GAMES: F-ZERO, JOHN MADDEN'S 92, GHOULS 'N' GHOSTS

GARY "SQUISH" HARROD

Gary was also bowled over by an automobile. He was riding happily along, wind in his hair, smile on his face and flies in his teeth when the driver of the vehicle in question pulled straight out in front of him (obviously not heeding that important advice, "look once, look twice, think bike"). The next second it was aerial antics afoot as Gary flew through the air. He landed on his head and was carted off to hospital for stitches-related japes.

CURRENT FAVE GAMES: ZELDA III, STREETFIGHTER II 20-20 BASEBALL

The Sega Light Phaser

MEAN

THE TIME, THE PLACE

The Super NES will be available from just about every Nintendo retailer (including Dixons, Boots, Woolworths, Comet and other high street chains) from Spring. However, Nintendo say "Spring", but it's expected that the machine will hit shops as soon as early March!

AT A PRICE THAT'S RIGHT!

Nintendo have aspirations of selling hundreds of thousands of Super NES machines, and to do this they've priced the Super NES very competitively. You

IT'S HERE! Nintendo have decided to officially release their flagship Super Famicom console in the UK, months earlier than expected! The Super NES, as it will be known, promises to bring a new dimension of excellence to the games playing public - at a magic price! **MEAN MACHINES** gives you the full story.

AWESOME GRAPHICS...

The Super NES has much the same technical architecture as the Japanese Super Famicom. Although its main processor is very slow (running at less than half the speed of the Megadrive's!), it's backed up by some awesome graphics chips. The Super NES has a massive palette of 32,768 colours and up to 256 of these can be displayed on-screen at the same time. Up to four screens (known as playfields) can be overlaid over one another to create some spectacular parallax scrolling. Perhaps the Super NES's most distinctive graphic trick is the ability to warp and rotate any 2D screen into a 3D image. F-Zero and Pilotwings are just two of the games that use this feature.

THE S

can expect to pick up a machine and a free copy of Super Mario 4 (which we reckon is one of the best videogames of all time) for a piffling £149.99 - a measly £20 more than a Megadrive!

SPECTACULAR SONICS

The Super NES's sound chip is capable of a veritable aural feast. Eight-channel sound is on offer, all produced by the custom PCM chip. The Super NES is able to generate its own sound waveforms (like the

SUPER NES IS HERE!

Megadrive) or use samples (like the Amiga). Sound samples are notorious for using up plenty of valuable memory, but the Super NES more than makes up for this by compacting all sample data automatically.

GAMES TO GO

The Super NES is being bundled with one of the finest video games ever created - Super Mario 4. Plenty of games are ready to be put on sale along with the machine, the first ones of which will include the brilliant racer F-Zero (90%), the awesome city building simulation, Sim City (94%), Pilotwings, Gradius III and Final Fight. There are plenty of other games in the pipeline, and towards the end of the year, expect simultaneous Worldwide Super NES cartridge launches!

ES

FUTURE OFFICIAL DELIGHTS

Plenty of third party Super NES developers have gear ready for release once the console is out and about. Konami have many games ready including the critically acclaimed Castlevania IV and Goeman Warrior (retitled Legend of the Mystical Ninja for the US and UK markets). Electronic Arts have some pretty top tier stuff in the form of PGA Tour Golf, EA Basketball and John Madden Football. Acclaim are also getting in on the Super NES act with some potentially awesome games like The Simpsons, WWF and Smash TV. Mindscape are another company with a licence to make Super NES games. Their first effort is Paperboy II - we'll reveal more about this game at a later date.

A DIFFERENT CASE

The Japanese Super Famicom was noted for its particularly ugly concrete block-like appearance, but it's been completely redesigned for the western world. The Super NES we'll be getting looks exactly the same as the

grey and purple Super NES on sale in America. The controllers are slightly different from their Japanese counterparts too. The X and Y buttons have indentations, so the player can distinguish between them and the A and B buttons by touch. Clever eh?

THE 16-BIT BATTLE

With the official release of the Super NES, the battle for the 16-bit consoles market begins proper. There's no doubt that in the graphics and sound departments, the Super NES beats the Megadrive hands down and at £149, it's a real bargain (grey import prices are still around £250 to £300). This has caused some industry pundits to speculate on a severe price drop for Sega's 16-bit machine - some people even see the price tag dropping down to a tiny £99.99! However, the real test for the Super NES will come in the form of Sega's Mega CD. This device boosts the Megadrive's performance far beyond even the Super NES's, but so far Sega has not announced the date for its arrival here in the UK. Perhaps the arrival of Nintendo's technically amazing machine will cause Sega to rethink their plans. As always, we'll bring you the news first...

DEADLY DINOSAURS

BEASTLY BOULDERS

MAD MOSQUITOES

UBISOFT EXCITEMENT

Paris-based Ubisoft have a great deal of Megadrive games they're just itching to release into the UK and European markets.

El Viento has been out on import for a few months now. It's a platform-based action extravaganza, casting the player as a hard woman out to completely annihilate the legions of the doom. Little is known about either Earnest Evans or Syd of Valis but as you can probably see from the screenshots, they're both platform games with plenty of meanie-bashing thrown in. On the other hand, *Beast Wrestler* is a one-on-one beat 'em up with all manner of slimy beasts battling it out for supremacy.

Finally, Megadrive-owning war-gaming freaks are promised a trouser-soilingly thrilling extravaganza in the form of *Master of Monster*. This looks like being a return to the strategy game of old where mastery of the world (and presumably the eponymous "Monster") depends on taking over the majority of hexagons on the highly detailed war map.

YOU CAN BE A GAME GENIE-US

Should the prospect of cheating on a whole host of Nintendo or Megadrive games appeal to you, you should seriously consider purchasing one of the groovy Game Genie 'Game Enhancer' devices soon to be brought to this country by the fine citizens of Codemasters. Simply plug your Game Genie into your console, plug in a game and power-up the machine. The Game Genie's code screen appears, enabling you to enter specific codes to make your in-game persona say, jump higher, punch harder or live forever once the game has begun.

Along with the cartridge, the Game Genie packaging contains a code sheet with all the codes needed to cheat on loads of Nintendo or Megadrive games. Since you can't actually hack into the games yourselves, you're forced to rely on further code sheets to cheat on other games - which will be supplied regularly to buyers of the cartridge. Codemasters are also promising to include a special code locator on the Megadrive version that should find a few codes for you on a limited number of games.

Considering that the creators of the Game Genie managed to weather a full-frontal legal assault from Nintendo in the States and still sell over 1,000,000 units, the device should go down a storm here in the UK. Codemasters hope to have the unit in the shops by the second quarter of next year. At the moment, the probable prices are £39.99 for the Nintendo version and £49.99 for the Megadrive Game Genie.

KRAZY KIWIS R US

Tecmagik has just announced its latest project for the Sega Master System. It's a conversion of Taito's successful coin-op, *New Zealand Story*. The game casts the player as the lovable Tiki, whose fellow Kiwi chums have been abducted by a bloated Walrus (???). Tiki swears an oath of vengeance and sets out across the eight-way scrolling platform landscapes, blasting meanies and rescuing his pals en route to the final showdown. As you can probably discern for yourselves from the accompanying screenshots, the Master System version of *New Zealand Story* looks remarkably close to the coin-op original. We'll be taking a closer look at this potentially hot game in a not-too-distant issue of MEAN MACHINES.

STREET FIGHTER II - OFFICIAL!

Street Fighter II - THE coin-op of 1991 is scheduled for definite release on the Super Famicom, despite reports from Japan that it's also going to appear on Sega's Mega CD.

Apparently, Street Fighter II fever is sweeping Japan at the moment (even the arcade music CD is in the Far Eastern charts), and Capcom thought it was best to release its top game on Japan's number one games system. Programming on the Super Famicom version has only just begun, so no screenshots of the conversion are available at present. However, Capcom is confident they can have the product finished and on the shop shelves of Japanese stores by the summer of 1992.

TUNE UP YOUR GEAR

The long awaited Game Gear TV Tuner is coming to the UK early in the New Year! Just imagine - soon it could be you amazing your friends and confounding your foes by watching your TV faves on the train, in the bus - but preferably atop a mountain of Duracell batteries. The Tuner has long been in the shops in Japan, but due to the difference between our television transmissions and theirs, it was completely ineffective for picking up English TV. Sega's development team went back to their proverbial drawing board and completely redesigned the Tuner's innards, and only now do they have a fully working device.

The TV Tuner will be sold at a wallet-busting of £74.99 - a trifling £10 less than a dedicated pocket colour TV! We'll be providing a full review of the TV Tuner just as soon as the final production version is ready.

RAIDEN TRAD - IT'S JUST SO

Just arriving too late for inclusion in the reviews section of MEAN MACHINES is the latest shoot 'em up for the Super Famicom - Raiden Trad.

It's vertically scrolling blasting 'action' all the way as one or two players attempt to kick the cack out of an alien taskforce that's attempting to take over Earth. The usual assortment of end-of-level bosses, extra weapons and power-ups await the player, for to Raiden has very little in the way of original features (see the last issue's Megadrive review for further details).

To say that the MEAN MACHINES team were disappointed with this con-version is a gross understatement. Raiden Trad has awful backdrops, wobbly scrolling (that slows down when you fire!) and it's also about as challenging and exciting as picking your nose. Even the sound is a sad debacle, with boring tunes and inappropriate, forlorn 'effects'. At £45, it's a waste of money.

POCKET ULTRAMAN

Ultraman, the rubber-suited super hero and rather unlikely guardian of Earth is to star in another game! After the phenomenal success of the Super Famicom version of the game, Bandai has bowed to public pressure and produced a scaled-down version for the Gameboy!

Hand-held Ultraman remains much the same as the cheesy (and yet brilliantly so) Super Famicom game. It's a simple side-on scrolling one-on-one beat 'em up, with Ultraman using his martial arts skills and laser weapons to fend off the attacks of rubber-suited 'dinosaur' alien marauders of doom.

If this can successfully capture the groan-inducing cheesy nature of the sad (but yet completely hilarious) movies, this is going to be one hot cat!

UNKNOWN BEAT 'EM UP LOOKS ACE

Coin-op manufacturer, Jaleco, has a mysterious new beat 'em up planned for the Super Famicom that looks pretty damn skill by all accounts.

We haven't actually been able to find out what it's called, but it seems to be a scrolling beat 'em up very definitely "inspired" by Capcom's awesome Final Fight. It boasts huge in-game sprites and simultaneous two-player action, a feature beat 'em up addicts have been crying out for.

Sounds pretty brill eh? Well, take a look at those underwear-solingly exciting screenshots! We'll give you more details as soon we know some.

●リックは夢、ダダラスはプロレス技で

HOLY COLLECTION OF ETRUSCAN SNOODS!

Sunsoft has just released the follow-up to their massively successful NES Batman game. Batman: Return of the Joker, once again casts the player as the Dark Knight, who patrols the scrolling platform levels in search of the twisted Joker.

The gameplay remains much the same as the original Batman game, but a scrolling shoot 'em up section has been added and the graphics have been substantially improved. The sprites, for example, are now almost double the size of the originals! The backdrops too are exceptionally stunning - especially for an 8-bit machine. Apparently, Sunsoft employed their own custom chips to make Batman II look and sound truly exceptional.

From the looks of things, Batman: Return of the Joker should be a veritable bat fest with playability oozing from every bat pore. Unfortunately, the bat signal hasn't managed to illuminate any UK release date yet. Oh well.

REALLY USELESS NINTENDO INVENTION

Just about every add-on conceived by man is available for the Nintendo in the States. Some of them are quite handy - others score top marks for sheer weirdness.

Definitely in the latter category is Lightwave Technologies' GameSounds device. This highly desirable item plugs into your NES (or Super NES or Megadrive for that matter) sound port and transmits the sound signals the console produces.

These signals are sent via the airwaves to a small box you attach to your person. Walkman-style stereo headphones are plugged into this box, enabling you to listen to the fab 'n' kickin' muzak your fave console game produces. As an added bonus, the headphone units double up as FM radio receivers - and at no extra cost!

Great eh? However, since there's no official UK release for this highly sexy device, you could just get some old Walkman headphones and plug them straight into the audio socket of your console. A plug adaptor may be required here for Nintendo and Super NES consoles, but this means you can enjoy much the same effect at a fraction of the cost, even if your freedom is limited by the length of your headphones' lead.

PC IS (\$)NES

The latest designer accessory for PC computer owners in the States is an add-on module for their machine that enables it to run Nintendo cartridges! What's more, the most desirable item money can buy is a module that runs 16-bit Super NES games on a normal PC!

The modules work by stripping away the consoles' cases and cramming all the circuitry onto a single PCB (Printed Circuit Board), along with interfacing chips to enable the console to work with the computer. Joypad controllers are also handed out with the package.

Funnily enough, the price for each of these modules is roughly the same as the original consoles, which is what you'd expect, really. The modules have also received Nintendo's Seal of Quality, which means that there's a microscopic chance that Nintendo will release them in the UK sometime in the future - we'll keep you informed.

NEW FROM NINTENDO

NEW FROM NINTENDO

The galaxy is being ripped apart by civil war! Striking from a hidden base, a huge organisation of rebels are launching attacks against the Imperial Empire - a force of evil threatening to consume the entire cosmos!

To make their conquest of the stars complete, the Empire have created the dreaded Death Star - a space station of immeasurable proportions with the most powerful weapons systems ever devised. With this planet-destroying tool at their disposal, the Empire aspire to rid the stars of the Rebellion once and for all and have a lot of evil fun and diabolical laughter into the bargain.

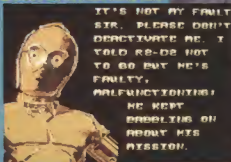

But the Empire's plans are not foolproof! Using her position in the Imperial Senate for cover, Princess Leia Organa of Alderaan has stolen the blueprints for the mighty space station and secreted them in the memory circuits of a certain R2 unit.

The Empire caught up with Leia and now have her held hostage in the Death Star. However, the R2 unit along with its translator droid counterpart reached an escape pod and jetisoned off to the desert world of Tatooine, where they became the property of someone by the name of Mr Luke Skywalker.

The Empire, however, want their blueprints back...

▲ Watch out for those Wampa Bats!

STAR WARS

◀ Pressing SELECT allows you to choose your Star Wars hero!

◀ The Millennium Falcon in action!

COMMENT

Star Wars is the best Nintendo game since Mario III! The first thing to hit you about this game is its sheer size - even the first level, the desert world of Tatooine is vast, with HUGE caves to explore. Later on the game's even bigger - you really believe that the Death Star is the size of a small moon! The graphics on every level are excellently defined, with instantly recognisable backdrops and

RICH

sprites. The sound is brilliant too, with tunes lifted straight from the movie (even each character has his or her own tune!). The effects are superb as well - the throbbing hum of the light sabre has been captured perfectly! Special mention must go to the ground-breaking, drool-inducing 3D sections - you won't believe that a Nintendo game could look so good! The game's a toughie too - after days of non-stop exhaustive play, the MEAN MACHINES lot could only see just over half of the game! Make no bones about it, Star Wars is completely brilliant. Get the message?

▲ Luke in a Death Star control centre

FOLLOWING THE PLOT

Star Wars follows the plot of the massive movie pretty closely, with all the situations and scenes of the movie present. In this MEAN MACHINES review, we've crammed the pages full of scenes from the game, and according to the in-game percentage meter, this is only 55% of the whole thing!

1 LANDSPEEDER LAFFS

You start the game in Luke's T-16 Landspeeder, scrolling around an eight-way scrolling landscape representing the desert land of Tatooine. Watch out Tusken Raiders and their Banthas, along with Imperial Spy Satellites and laser outposts. Contact with these is very painful.

2 POT-HOLING FOR FUN

Entering one of Tatooine's many caves propels Luke into a side-on eight-way scrolling environment. The aim here is to reach the exit (helpfully marked by a flashing EXIT sign) after collecting the useful items contained therein (like blasters, energy pods and shields for the Millennium Falcon). Tusken Raiders, mercenaries and Womp Rats inhabit the caves looking for the ingredients of a nice Skywalker-on-toast meal, so watch out!

NINTENDO REVIEW

牛奇集

▲ Luke in a Death Star control centre

3 SANDCRAWLER AHOY!

The Jawas have R2-D2 held captive in their sprawling sandcrawler. It's Luke's job to get him back and then deliver him to Obi-Wan Kenobi. However, the Jawas have other ideas, which generally involve blasting Luke with the blaster-like objects secreted on their persons.

STAR WARS

I'M HAN SOLO, CAPTAIN OF THE MILLENNIUM FALCON. CHEWIE SAID YOU'RE LOOKING FOR PASSAGE TO THE ALDERANN SYSTEM.

▲ Han Solo's talking business.

4 CANTINA ACTION

The Cantina in Mos Eisley is a dangerous place. Bounty Hunters and other riff-raff infest the environs, just looking for someone like Luke to kill. Survive, and the friendship of Han Solo is yours - and you'll need him to complete your mission.

7 THE DEATH STAR!

Alderaan has been destroyed by the Death Star, which captures the Millennium Falcon and its occupants. However, our heroes escape, determined to find a way to close down the tractor beam holding the Falcon. R2-D2 patches into the Imperial Network, allowing you to bring up a map of the Death Star at will. It also helps you locate the imprisoned Princess Leia.

6 WATCH YOUR ASS-TEROIDS!

5 DOCKING BAY 94

Reaching Solo's ship, the Millennium Falcon, is made all the more difficult owing to the fact that Mos Eisley is infested with Bounty Hunters and Storm Troopers. Overcome these hazards, and you're free to blast off in the fastest ship in the quadrant!

▼ Those TIE Fighters are just scenery.

▲ Driving Into Mos Eisley.

REVIEW

Collecting that blaster powers up

▲ Watch out for pesky Jawas, Luke!

8 THE TRACTOR BEAM

This screen shows the tractor beam generator holding the Millennium Falcon. It's our heroes' job to hit the weak spot in the top centre of the generator several times. Those laser bolts streaking about make things rather more difficult.

9 THE TRASH COMPACTOR

Misery bel! Not only are the heroes trapped inside a trash compactor, they've also got company in the form of a highly dangerous... er... thing.

▲ *Leia's just ripe to be rescued, eh?*

10 ESCAPE FROM THE DEATH STAR!

Having escaped from the Death Star, the heroes are now beating a retreat in the Millennium Falcon. Tie Fighters have been dispatched to bring them back, and you've got to shoot them down.

11 THE BATTLE ABOVE THE DEATH STAR

Having reached the safety of the rebel base on the fourth moon of Jarvin, Luke is drafted into the attack on the Death Star. This long and very tough sequence is a 3D shoot 'em up viewed out of the window of the X-Wing.

THE FORCE IS STRONG IN THESE ONES

Once recruited, each hero in Star Wars can be selected at will (by pressing the SELECT button). Each of them have their own strengths and weaknesses. Only Luke, Han and Leia actually see action in the platform sections of the game. The rest are just selected for individual skills.

COMMENT

JULIAN

Star Wars is one of my all-time favourite films, so I was keenly anticipating this and I'm happy to say it doesn't disappoint in the slightest. Before you ask, it's not a conversion of the coin-op but is instead an original game based on the film and boy is it massive! The bulk of the action is platform-based, as Luke first assembles the team and then moves to the Death Star to rescue Leia. There are also 3D sections, including negotiating an asteroid storm in the Millennium Falcon, shooting down the pursuing Tie Fighters as you escape from the Death Star, the final battle above the Death Star in the X-Wing AND the spectacular trench run sequence! The gameplay is just brilliant. It's tough, but amazingly addictive. You seem to progress a little further each time, so you keep on going back to see what's around the next corner. The graphics are also excellent, with small, but nicely detailed sprites, great 3D sequences and stunning still and intermission screens. The sound consists of a whole bunch of instantly recognisable tunes. Star Wars is one of the best Nintendo games yet seen - I can't wait for The Empire Strikes Back!

LUKE SKYWALKER

Luke has great strength and agility, and although he only wields a low-power blaster, his light sabre is very powerful indeed. Indeed, it kills all foes with one hit as well as shields him from blaster shots. He's the team leader, so keeping him alive is a top priority.

HAN SOLO

Found in a seedy cantina in Mos Eisley, the incorrigible rogue and captain of the Millennium Falcon has speed and agility equal to Luke Skywalker. However, he's more suited for a pitched blaster battle, owing to his high-power sidearm.

PRINCESS LEIA

Once rescued from the detention area of the Death Star, Leia is an instantly valuable member of the team. Her blaster is slightly more powerful than Luke's and her speed and agility are unrivalled, allowing the royal one to reach places Luke and Han have difficulty getting to.

C3-PO

This translator droid has no active part in the game. Instead C3-PO serves to translate R2-D2's unintelligible digital mutterings. His scanners come in handy for locating R2-D2 at the beginning of the game, otherwise he just gets not to be deactivated all the time.

R2-D2

R2-D2 starts the game as a captive of the Jawas on Tatooine. Once liberated, he's invaluable to the team since he can interface with any computer system - even the Death Star's! R2-D2 also carries the plans necessary to destroy the Death Star in the final part of the game.

BEN OBI-WAN KENOBI

Found in the sandy wastes of Tatooine, Obi-Wan is a master of the Force and can even use its strange and mysterious powers to resurrect the dead! However, use this bizarre facility too much and Ben starts to "sense a disturbance in the Force", which negates his powers.

STAR WARS

BY: LUCASFILM

PRICE: £39.99

RELEASE DATE: JANUARY
GAME DIFFICULTY: TOUGH
LIVES: 3

CONTINUES: 10
SKILL LEVELS: 1

RESPONSIVENESS: FAB

PRESENTATION 94%

Superb! Great presentation throughout, the highlight being the brilliant cameo pics of each major character.

GRAPHICS 95%

Small, but superlative sprites and backdrops that are very close to the original film! The 3D sections are just mind-blowing!

SOUND 88%

Star Wars has tunes and effects very close to the blockbuster film's. Even the blaster noises are spot-on!

PLAYABILITY 96%

Both the platform and 3D sections are very tough indeed, but watch out, Star Wars also has almost dangerously addictive qualities!

LASTABILITY 94%

It takes ages to see all the treats Star Wars has in store, and because it's tough you'll be at the NES for many moons!

OVERALL 95%

The best console film tie-in yet seen, Star Wars is the best thing since Super Mario Bros III!

NEW FROM NINTENDO

NEW FROM NINTENDO

MEAN YOB!

YOB kicks off the New Year with another bunch of top letters, cruelly culled from his large and bulbous, but strangely soft and squidgy mail sack. If you anything remotely interesting to say, or have pictures to send or whatever, write to OOH MY PANTS ARE ON FIRE BECAUSE I TRIED TO LIGHT MY FART MAILBAG, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGTON LANE, LONDON, EC1R 3AU. Don't forget that there's £150.00 worth of games for the best letter of the month.

THE MOST CRAP LETTER EVER

Dear Mean YOB,
Hello again! Since my last letter it has come to the attention of the Sad Cases and myself that many of your readers are still in a sorry old state. In response to this we have formed SCABS (but the doctor has given us a special cream for it).

But seriously (or not, as the case may be), SCABS stands for the Sad Cases Aid for Big Sillyies. The aim is to help all of your poor readers who feel the need to let off something a bit less pleasant than steam.

So, readers, if you're about as popular as Jeremy Beadle, as funny as the apricot joke on a lolly stick, have the vocabulary of the utterly, utterly pathetic Timmy Mallett, the sex appeal of Arhur Fowler in his Y-fronts (or indeed, not in his Y-fronts), or if you're basically just a bit of a Martin Palfrey, then fear not, it can find us, maybe you can hire:

Mr Luggage and the Sad Cases, SCABS, Lost Property Dept, Heathrow Airport

And please do remember to enclose a large SAE so that we can mail ourselves directly to you for immediate support (got the

sledgehammers ready, Sad Cases?).

Anyway, enough of me, just to say keep up the fab insults and as a wise old Chinese man once said to me "Praise can you tell me, where are toilets, please?"

Mr Luggage and the Sad Cases, Kingshorpe, Northampton

YOB: What's wrong with people this month? They think they're funny - but they're obviously not. There isn't one funny thing in this letter. It's pure, inane driven which should be carved onto a large and very pointed stone slab and shoved up the author's rectum.

CLUB NINTENDO SAD DEBACLE

Dear Mean Yob,
I've got so much to say that you'll probably never print this letter, so I don't know why I bother. Anyway, I've written primarily to say how utterly (and I mean utterly) stupendously terribly crap the GX4000 is. I would sooner play the "Game of Life" with Paddy Ashdown on Wednesday in Mid-Glamorgan in a B+Q garden pond.

So much for that subject, onto the new crew member, Radion "Whataman" Automatic. He is the best thing since Oz Browne (oh, and Marmite covered banana sandwiches, no offence Harrold!).

Onward to the next subject, is Club Nintendo run by sad, unsound Going Live presenters? It seems that way. Half the stuff that they preview has been out sixteen squillion years, plus all of the games on the NES are given excellent reviews, even Goal which you lot gave 33% I choke on the thought!

Chris Holdridge, Spottobrough, Doncaster

YOB: Ah! Club Nintendo! Mark Smith, editor of said rag isn't quite a sad, unsound Going Live presenter. He didn't make it that far, I'm afraid! Instead he was lumbered with the job of sticking his hand up Gordon the Gopher's ass every Saturday morning to make the irritating little creature squeak.

MR VEG STRIKES

Dear Great YOB,
I'm just about to get a Nintendo NES for Christmas. The games I'm getting include Super Mario Bros and The Simpsons and I may be getting one more if I eat veg. For

▲ Erwin Delgado sent this in. Cool, eh?

each new veg I eat I get a NES point, and I need about forty (I'm a packy eater!) Anyway I'm not sure what I want, so could you tell me a list of games you recommend (Mega games or just below)? By the way your mag is brill.

Andrew Maddern, Chwyd
YOB: I'll tell you what you want - a good punch on the nose for not eating your vegetables, you fussy git. Think yourself lucky you've actually got something to eat...

GRAPHICS BACKLASH

Now pay attention young YOB fellow!

A recent cartoon in your snazzy publication depicted a certain ex-member of your staff being time-travelled back to the "Land of Crap Graphics", a very spiteful name for an era I like to look back on as "The Glory Years". The early Eighties saw many delightful innovations such as the Atari VCS, the Intellivision, the Coleco and the Vectrex. During these times computers were in the minority, but their day was to come! The brilliant consoles wowed us, holding us spellbound with classics like Combat, Circus Atari, Dodge 'Em, Pacman, Space War, Defender etc. All these at bargain prices too. How many whingers have complained about today's high prices? Thirty or forty pounds for a Nintendo/Sega game? The price of most Atari VCS software was thirty pounds! Good value eh? We thought so at the time!

Who would have thought that a balding, four-eyed bearded chap could lepple these console giants? The release of cheap, but crap, computer alternatives brought the downfall of the console. How could they compete with the ZX80 and the ZX81 + 16k RAMpack (and wobble)? The Atari computers, the Commodore computers and the Sinclair Spectrum finally killed the console, at the time it was thought to be dead and buried forever. It is in the late Eighties that we begin to see a rebirth. The Japanese giants having already conquered their own country and the USA begin to invade us. Nintendo and Sega release their basic models and begin the new wave. So the circle is complete. The Phoenix has risen again! But what does the future hold? Will

▲ A great pic here from Jasvinder Bhui.

some bald geezer with a high IQ change our minds again? Will the orientals keep a grip of the console market? Will we ever see the Konix?

Boring Old Fart, Hornchurch, Essex
YOB: Yes, they were fun days and I agree with all you say. But while they may have been "Glory Years", at the end of the day, when all's said and done those graphics were still crap!

RETARDED AMIGA OWNER WRITES

Dear poor excuse for a magazine, I am constantly hearing about an argument between Super Famicom owners and Amiga owners. We all know which is the better machine, so why do you and your writers always try to make Super Famicoms better than Amigas because it simply isn't true. There is a boy in my class who we shall call Pierre for the sake of not mentioning his name who is always arguing with me that the Super Famicom is better than the Amiga. Try not to be biased or can you, not face the truth? Enter this letter into your magazine and publish the truth for a change.
Nick from Rochdale (an Amiga owner)

YOB: Dear poor excuse for a human, The Super Famicom was designed specifically to play games. The Amiga wasn't. And while the Amiga can be used to do lots of useful things, when it comes to being a games machine, it's not as good as the Super Famicom.

SCOOP, SCOOP AND SCOOP AGAIN

Dear YOB, I have heard through another magazine that a certain consoles magazine rates games quickly and before the game is entirely finished thus not giving their readers a very efficient rating.

Please could you tell me if this is you as you do seem to review games before them.
P M Uke, Chelmsford, Essex
YOB: Sega and Nintendo don't actually send out unfinished games, so the magazine in question is talking rubbish. Why? Because we're different from them - we're liked by game producers (which is why MEAN MACHINES always gets games first), we are more skillful, far more talented and also, we don't like wearing women's clothing.

STUPID PERSON ALERT

Dear Mr YOB I hear that people are "sprucing" up their Gameboys by painting them; great idea!

Have any other readers got suggestions for colour schemes for their consoles? I painted my Megadrive black.

Mr P Scatter-Cushion, Barnsley
YOB: You're about as funny as a one-legged man in an ass-kicking contest.

▲ Great stuff from Mike Carr.

MEAN YOB!

STUPID PERSON ALERT II

Dear Mr YOB,
I find that inserting a controller (marked "controller" in the box) into my Megadrive improves gameplay no end!
P Scatter-Cushion, Barnsley
YOB: You're about as funny as a leper in a wind tunnel.

STUPID PERSON ALERT II: THE REVENGE

Dear Anne Robinson
What a great programme Paul Daniels' "Every Second Counts" is!

▲ "The Leech" gave us this picture.

Keep up the good work!
P Scatter-Cushion, Barnsley
YOB: You're about as funny as a bout of diarrhea in a spacesuit.

SON OF STUPID PERSON ALERT II: THE REVENGE

Dear Mr YOB
I think you make all these letters up.
Including this one.
P Scatter-Cushion, Barnsley
YOB: You're about as funny as a turd in a swimming pool.

SAD OLD MAN

Dear MEAN YOB,
I came down for breakfast on Monday morning, half asleep as usual, when I noticed an article on the front page of the Guardian. It was titled Prof Eugene Takes On Video Villains. Being very into consoles and games and such I read on. It turns out that a professor called Eugene F Provenzo Jr has written a book called "Video Kids" in which he says that video games encourage sexism, violence and racism. He has played the top forty seven Nintendo games for six months.

He reckons that only seven out of these forty seven are non-violent. But get this, he also says that Megaman is Ramboesque, (yes that's the same Megaman that shoots bubbles!) and that people don't realise that the machine isn't neutral but channels and frames our view of the world.

I'm sorry professor, but I can't agree. I don't clock Mario 3, turn into a raccoon and fly, and I especially don't jump on people's heads on the off-chance I might be awarded thirty five points. After playing Double Dragon, strange as it may sound, I have absolutely no urge whatsoever to throw rocks or whip people.

I love consoles, games and stuff but there is no way I could or would be influenced by them, to me and millions of others they are harmless fun! What do you think?
Harry Lawdwith, Oxford

YOB: I assume that after six months of playing those titles, the Prof didn't turn into a gibbering, racist, sexist homicidal maniac. Or perhaps he did? I could go on for hours about the subject, but I haven't got the time or the space, so I'll just make this point. When you don't look at the whole picture, are highly selective in the examples you use and present very narrow-minded arguments, it's very easy to paint a black picture of virtually anything.

▲ Rob Pierce sent in this stunning picture.

▲ Yes! A skill pic here from Rob Pierce again!

ROLLERGAMES™

Course poursuite effrénée sur rollerskates

Les Roller Games sont les jeux préférés du XXIème siècle. Mais les membres criminels de V.I.P.E.R. veulent s'emparer de l'argent attribué au Prix Mega. SPONG!!!

Dear Mean YOB,
In response to Ian "what really gets on my tits" Biggam's letter. I am the PROUD owner of a Megadrive, Master System, Famicom, NES, Gameboy, CDTV, Amiga, ST, PC Engine, Turbo Express, Game Gear, Gamate (er... no, I don't quite think so) and Neo Geo. So there.
Sisur! "someone who sounds like a complete dimwit" Fernie, Guildford, Surrey
YOB: You'll be the PROUD owner of a black eye if you don't shut with your inane rubbish....

THE DARKER SIDE OF SUNNY

Dear YOB
Can I through your column in the "Well Hard" MEAN MACHINES reveal this world exclusive - Sunny Mann's glasses are a fake! Yes

folks Sunny Mann's image as an optician's love child are completely false... she stole the glasses off me. Me being Dirtyole Mann, Sunny's long lost brother and for years the proud owner of a pair of stupid and utterly ridiculous blue-framed specs. Sunny knew this and when she came into the public eye she had to create an image for herself and before you could say "rollocks", she had half-inched my specs.

I'm really cheesed off about this, suffice is to say I'm as happy as Judge Clarence Thomas in a room full of naked women, while bound and gagged. But I hope that through your mag the world (well, the gaming world anyway) will know the scandalous truth.

Large Framed 3D Glasses, Somewhere in deepest, darkest Belfast

YOB: Since you're obviously not wearing glasses (they being stolen by Sunny), does that mean I can punch you in the face for being so utterly reticent?

MEAN MACHINES ON TV?

Dear YOB,
I am sure many readers will agree with my point. Why don't you make a MEAN MACHINES TV programme? This way, we could actually SEE how the game plays, hear the sound etc and that would be ten times better than a "proper" review (not that yours aren't already good!).

It could be presented in a Chart Show style and it could act like an add-on to the mag. For instance, every game that you review, you could actually play on it there and then. I'm sure that it would cost a bit - but who cares? You love your readers, right?

Michael Pittorids, London
YOB: We can't do it because we're a magazine publishing company, not a TV station. Doh!

WHINGING ILLITERATE WRITES

Dear Mean YOB,
As a few of your readers have been writing in with suggestions, I'd like to have a whine.

Not knowing a hell of a lot about computers and just wanting to play games, I bought an NES.

Being chuffed with buying MEAN MACHINES, I have a small gripe about Jaz and Rich's reviews. Brilliant though they are, computer jargon like "superlative parallax scrolling" creeps in now and again. What the hell does that mean? I wouldn't know superlative parallax scrolling if it painted itself purple, danced nude on top of a piano shouting "I'm superlative parallax scrolling!"

If you could ask Jaz and Rich to put things a little more simply, I'd be more than happy than what I am now!

Sorry this wasn't a verbal slag-off saying "My mates a complete twot etc".

Master Bates, Stockport, Cheshire
YOB: "Parallax scrolling" is the technical term for multi-layered scrolling background graphics. Each layer moves at a different speed, which is why it's called parallax scrolling. Why don't

MEAN YOB!

▲ This Strider pic comes from Harmeet Jandu. Mega!

HOW TO DOUBLE YOUR TELEPHONE BILL

Dear YOB,
I am writing to tell you of a brilliant idea for your mag which I thought of while reading the latest edition. As we all know you try to fit as many reviews as possible, but there will always be some games that don't get in. So what I thought you could do is record short comments and give an overall percentage for each game then put them on 0839, telephone numbers that is the competition hotline.

You could have Megadrive, Famicom lines plus lines for all the other consoles you cover. Each line could have several games on them which have not been reviewed in your mag.
Martin Randle, Willenhall, W Mids
YOB: And we'll make tons of cash out of them too! Yippee!

FRIENDLY

Welcome to 1992! Jazza's got his celebratory pan-European sparkling special answering trousers on and he's ready to indulge in a veritable question answering fest! If you've got anything to ask the man who carries his intellect around in a sack marked "manure", write in. No question is too tough, so write away to: **JAZZA'S STAINED BROWN SACK O' INTELLECT, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGTON LANE, LONDON, EC1R 3AU.**

EDAM

Dear Jaz,
I was wondering if you could possibly answer these few questions.

1. When the Mega CD comes out will it make the Megadrive better than the Super Famicom?
2. Will there be any decent beat 'em ups out for the Megadrive before Christmas?
3. On the first of December the Mega CD comes out in Japan, will I have to wait for an English CD-ROM or will the Japanese CD

work with my English machine?

4. Is Stormlord better than Ghouls 'n' Ghosts?
 5. Will Street Fighter ever come out on the Megadrive?
 6. Are any good football games coming out on the Megadrive?
 7. Is Pit Fighter any good on the Megadrive?
 8. When will Rad Mobile be out?
- David Montgomery, Halifax
- JAZ: 1. Yes. 2. No. 3. We're not sure yet - it's best to wait and see. 4. Nowhere near as good. 5. Nope. 6. Yeah - Super Kick Off is going to be completely mega. 7. It's not bad - wait for the review next ish. 8. Not until later on next year - more information as soon as we have it.

CHEDDAR

Dear Jaz,
Please can you help me. I have recently bought Spiderman for my Megadrive. I am stuck on the end of level baddie on level four, the Sandman. He is just too quick for me, please can you tell me how to kill him. Do you have to use the fire hydrant at the beginning? Also, does he have any patterns to make it easier? Hope you can help me progress on this superb game.
M P Kay, Manton Eccles, Manchester

JAZ: Lure him to the fire hydrant, then when he's close by, kick the hydrant and the water will wash the evil rogue away.

CAMEMBERT

Yo Jaz,
I was wondering if you can answer these questions for me.

1. Is there going to be a football manager game on the Megadrive?
2. How much will the CD-ROM machine cost? How about games? When will it be officially released?
3. Is it possible to upgrade your CD player to a CD-ROM?
4. Is there going to be a Vanilla Ice game?

Muhael, Bristol

JAZ: 1. Nah, unless US Gold decide to release Super Kick Off Player Manager. 2. The machine is expected to cost £299.99 when it's released - but a date is yet to be announced. We believe that it could well appear by the summer! 3. No. 4. Yeah, unfortunately, it'll appear on the Super Famicom. Bleugh! Pass me the vom bag.

KNOB

Dear Jaz,
I currently own an NES, although I'll soon be getting a Megadrive but I have a few queries still, so...

1. What is the advantage of getting a Japanese convertor for the Megadrive?
2. What will the CD-ROM do?
3. Can consoles using SCART run through the SCART socket on a VCR rather than the TV?

Zippy Frood

JAZ: 1. So you can play imported Japanese games you dozy nit. Doh! 2. Everything except make cups of tea at four thirty in the morning (CD-ROMs need sleep too!). 3. No - the picture comes out all wobbly and crap on the telly.

SWISS

Dear Jaz,
I am, of course, the proud owner of a Megadrive and was wondering if you could answer my questions.

1. Will there ever be a Mickey Mouse 3? If so, when?
 2. I've heard rumours that if or when Sonic 2 is released. The game is for two players with a grey hedgehog to accompany Sonic on his travels. Is it true?
- Paul Roche, St John, Jersey
- JAZ: 1. I've heard no rumours as yet. What I can tell you is that other Disney characters have been lined up for Megadrive stardom - we'll keep you posted. 2. Not as far as we know.

CAERPHILLY

Dear Jaz,

Would you please answer my questions

1. Is TMNT coming out on the Megadrive?
2. Is Sword of Sodan any good?
3. Is Final Fight going to be out on the Megadrive?

Aaron Miller, Rycroft, Walsall

JAZ: 1. It's been put on hold, and I don't think it'll ever appear. We'll let you know if the situation changes. 2. No, it's vile and revolting and shouldn't be allowed. 3. No, no ten zillion times nooooooooooooooooooooo.

STILTON

Dear Jaz,

1. We went into Comet and the man said that the English Megadrive that was in there could play Japanese games. Is this true?

2. What are your favourite Megadrive games?

3. What do you think of Mickey Mouse, Gynoug, Super Monaco GP, Magical Hat and Fantasia? Mr X, Whitehall, Bristol

JAZ: 1. Yes - with an adaptor. 2. At the moment, John Madden's '92 and Robocod are top of my playlist. 3. Great, great, great, great, steaming crock o' hoss dung.

LEICESTER

Dear Jaz,

Please could you print this letter as I'm desperate to find out the answers.

1. Will there be a Sonic 2 on the Megadrive?
2. With the release of the Mega CD unit, will there be such games as Final Fight or Street Fighter 1 or 2?
3. Is there a game being programmed called Gang Wars?
4. With the release of Mercs, is there a Mercs 2 for the Megadrive?
5. Have you seen any early screen shots of the games Aliens 3 or Predator 2, and if so are they looking good?

John Fowler, Braxbourne, Herts

JAZ: 1. Yes. 2. Final Fight? No. Streetfighter? Sadly lacking. Streetfighter II? Yep. 3. I've heard rumours, but no evidence is forthcoming. We'll let you know. 4. No. 5. Yes, and they're both looking very promising.

G+A

COTTAGE

Dear Jaz,

I own an Amiga and a Megadrive and they are both brilliant. At the moment I have three hundred pounds saved for a Mega CD, and I was wondering if you could answer some questions for me.

1. How many colours does the Mega CD have?

2. How much will the games cost for it?

3. Will Pit Fighter be coming out on the Mega CD?

Dave Roberts, Morecambe, Heysham

JAZ: 1. The same as a normal Megadrive. 2. Nobody knows yet - it's cheaper to produce CDE than ROM cartridges, but since there's so much more programming involved in a CD-ROM game (if the machine is used to its full potential), they might be just as expensive as their cartridge counterparts. 3. No.

BRIE

Dear Jaz,

Could you please answer my following questions.

1. I'm thinking of getting a Megadrive but I am not sure if I should get a Jap or a UK version. Which is more reliable?

2. Do UK/USA games work on a Japanese Megadrive? If not, what do I need?

3. Will a Jap Megadrive display English text?

Paul Barkley, London

JAZ: 1. They're both the same.

2. Yes. 3. No.

GOUDA

Dear Jaz,

I would be pleased if you could answer my questions.

1. Is there a release date for Sonic 2 on the Megadrive?

2. What is Mr Komatze like?

Dave and Gav, Somewhere

JAZ: 1. No. 2. Eating a plate of snot.

GORGONZOLA

Dear Jaz,

One of my all time favourite games has to be Turrican on my old C64. Unfortunately (tears of sadness), I had to sell it to get some dosh to buy a Megadrive. Imagine my cries of joy when I found out that Turrican was coming out on the Megadrive. But has it got the same brilliant playability as the Commodore 64 version?

Also, there are rumours that

there will be an Action Replay cartridge for the Megadrive and it will enable you to play Japanese games on it. Is this true? And if it is, how much will it be and when will you be able to play it? A Very Excited Megadrive Owner, Hemi Hempstead, Middlesex
JAZ: Saddy, it's anti-climax time for you, Mr Excitement. Turrican is a naff shambles which simply isn't worth getting. The Action Replay is on its way - expect us to review it within the next few months.

PROCESSED

Dear Jaz,

I have just become the proud owner of a Megadrive and have loads of questions to ask!

1. Which would you say is the best shoot 'em up game for the Megadrive?

2. Is Afterburner 2 any good?

3. If you buy a Master System

converter are the graphics and sound improved?

4. Is it worth buying a second joystick?

5. Is Speedball 2 any good? I know it is for the Amiga.

Theo Sirota, Wells, Somerset
JAZ: 1. Gynoug. 2. Yes - if you like Afterburner. 3. Not in the slightest. 4. Depends if you want to indulge in a lot of two-player action. 5. Yes.

PHILIPS

PHILIPS INTRODUCE A TV WORTH LOOKING AT EVEN WHEN IT'S OFF.

The new Philips Discoverer is a television that most definitely isn't square. We've rebelled against convention and designed a television that doesn't look like a box.

You've seen the films, you've got the bike, you're wearing the jacket, now it's time to rev-up and buy the television.

A television that not only looks different, it also behaves differently, with high-tech features like on-screen display, remote control, sleep-timer and 40 pre-set channels.

For more information and to find where your local dealer hangs out ring 0800 234 800. After all who wants a normal television when you can have the leader of the pack.

YOUR tv

THE FUTURE IS PHILIPS

TIPS

Yo! Welcome to the MEAN MACHINES Tips Section - the pages in the mag we choose to print tons of topper hint and cheats on for your delight. This month we've got a veritable bonanza of tips including Speedball and Xenon II tips and a Nintendo Simpsons low-down! Yay! If you want to contribute to the section, send in all your stuff to THE TIPS SECTION, MEAN MACHINES, Priory Court, 30-32 Farringdon Lane, London EC1R 3AU. Remember, we've got a hundred and fifty of your English pounds sterling to shower on one lucky tipster per month, so hurry up with those NEW and EXCITING tips!

Tony Hanley from Wakes Colne near Colchester (which is about ten miles from my humble home actually) also sent in some helpful pointers for this pretty disappointing Ballistic release.

Use your high-power laser whip to locate hidden goodie blocks. For example, there's one to the far left of your starting position. Also, should you wait a few seconds at this position, a 1-UP should magically appear!

Also, on the lightning level use your lightning whip around the generators to reveal loads of goodie blocks. However, DON'T destroy them! Use them as stepping stones, using the whip to reveal the next goodie block. Carry this on and you should arrive at a high platform stacked to the brim with 1-UPs! Follow the platforms right and you should avoid every strike of lightning too! Not bad, eh?

toEjAM & EarL

Tom White from Hemel Hempstead sent in this cunning plan to get to the very mysterious level zero of Toejam and Earl.

On the fixed world setting, go as far as level three, collecting as many presents as possible. Find a carrot man and ask him what are in the boxes. If you have either the Icarus wings, rocket skates or the float, fall back to level one. Open the present and travel across the water, heading for the bottom left corner of the map. You should come to an island. Fall down the hole in the centre of the island and you land at level zero!

SONIC THE HEDGEHOG

Everyone's heard about the boring old level select cheat for Sonic the Hedgehog, but Tony Hanley (this could be Handey - Tone's signature is dire) from Wakes Colne sent in this cheat to get you to the bizarre Debug screen of the game.

On the title screen press UP, C, DOWN, C, LEFT, C, RIGHT and C. You'll hear the ring sound. Now hold down A and press START until Sonic appears. To see if the trick has worked, look at the score. It should be, as Tony puts it, "a bunch of letters and numbers), although our fads would call it hexadecimal notation.

Press B to get into the DEBUG mode. Press A to change the sonic character into another and press C to put this onto the playfield. Funnily enough, Sonic is totally invulnerable on this playing mode too.

As Tony correctly points out, this trick only works on the first production run of Sonic carts - so there's a good chance it might not work if you bought the game during the last couple of months. Ah well.

We must have had tons of letters proffering tips for the latest Mario classic (rated at 98% in October's MEAN MACHINES!), so check out the following tips very carefully. By the way, the author of most of these tips didn't bother to include his name - doh!

WARP WHISTLES

There are three warp whistles in the game which are used to warp your way to later sections of the game. Here's where to find these items.

LEVEL 1-3: Kneel down on the white block near the end of the level for five seconds. After you drop behind the background run to the end of the level to find a hidden toad house with the whistle.

WORLD ONE FORTRESS: Fly up and right as far as possible, through the gap in the ceiling. Continue right until you can't go any further and then press up to enter the hidden room with the whistle.

WORLD TWO HAMMER BROS: Use the hammer to break the boulder in the upper right corner of world two's map. Battle the Hammer Bros hiding behind the boulder to get your hands on the final whistle.

SUPER MARIO BROS.

WHERE TO USE THE WHISTLES

If you use the whistle in world one you may choose to go to worlds two, three or four. If you use it in world 2-6, you may choose from worlds five, six and seven. Finally, should you blow that whistle-like object on world 7-9, you are warped to world eight!

CARD TABLES

There are only eight of these bonus goodie tables found in the whole game. Simply turn over a few cards to discover which table you've been landed with, consult this page and you're away - hurrah!

EXTRA LIFE TACTICS

Use these tactics to get your grubby mitts on loads of extra lives

In world 1-2, while you're Raccoon Mario, kill nine enemies in a row without touching the ground to get you that life.

In certain worlds (like 3-4 and 3-9) you are faced by a continuous attackers such as Bullet Bills or Spinyes. Find a place where you can set up a Koopa so it bounces between two obstacles and clears away the enemies. Quickly get to a safe spot and as the enemies are

NINTENDO TIPS

牛奇集

IRONWORD, THUNDERWORLD WIZARDS & WARRIORS II

Darren Brooks from Surrey strikes again with a little tiplette that boosts the results of your Ironword password. Should you have less than three lives with your current password, change the fifth letter to N to give you three of those valuable lives. Yeah!

GAME BOY

We've had quite a few notes from readers supplying codes and the like for this Gameboy classic. However, the best tips of the lot came from Martin Key from Drayton Bassett in Staffordshire. Tackle the bosses in the following order.

LECMAN

The first boss to blast into oblivion is Elecman. Use your Plasma Cannon on him to get the Thunder Beam.

PASSWORD: A2, A4, B3, D1, D2

ICEMAN

Use the Thunder Beam to defeat this guy. You'll get the Ice Slasher for your troubles.

PASSWORD: A1, B4, C1, D2, D4

FIREMAN

Fireman's next on your hit list. Defeat him with the Ice Slasher (pretty obvious really, eh?). Conquering him gives you a

spanking new Fire Storm for your efforts.

PASSWORD: A2, A3, C1, D2, D3

CUTMAN

Use your newly-acquired Fire Storm on your last target, Cutman. You'll be rewarded with a Rolling Cutter and a Catch (a floating platform). Use the password below and you're warped to Dr. Wily's castle - tips for which will appear in next month's MEAN MACHINES!

PASSWORD: A2, A3, B4, C2, C3

SUPER MARIO BROS.

That man Darren Brooks certainly seems to be hogging it a bit, but still, he did send in just about every secret bonus in Super Mario Bros! Take it away, Daz!

LEVEL 1-1: Try the third pipe.

LEVEL 1-2: The third pipe from the end is the one for you.

LEVEL 3-1: The second pipe along yields results.

LEVEL 5-1: Scoot along to the second from last pipe.

LEVEL 6-2: The fifth and sixth pipes lead to bonus stages.

POWER GLOVE

Speedball is one of the best games released on the Master System in recent months. Follow this guide, supplied by the producers of the game, for maximum success! Remember, it's not the winning that counts, it's the taking part (as well as indulging in plenty of gratuitous violence!).

TEAM STATS

TEAM VERNIA			TEAM MIRR		
CAPT	KEE	BN	CAPT	KENDH	BN
HEIGHT	5'3"	5'6"	HEIGHT	5'3"	5'6"
WEIGHT	150	165	WEIGHT	150	165
SKILL	100	100	SKILL	100	100

By looking at the stats beneath each team, there's no real difference between them. However, smart cookies should go for the middle team - Lacera. These guys come with 200 power points as standard, and in a game as violent as Speedball, every bit of power counts.

LOB 'N' TACKLE

Stand in front of the goal, but a fair way down the pitch. Hold down the button to attempt a powerful shot in the direction of goal. Now run forwards, punching the hell out of the opposing goalie. This leaves you with an open goal!

SPEEDBALL

PITCH DIRECTION

When you're up against the computer, you always play up the pitch. This means that after a while, playing this way becomes second nature. So, when you attempt a two-player game, make sure you're player one. Player one ALWAYS goes up the pitch - giving a slight advantage over the opposition.

RICOCET ACTION

Throwing the ball so that it ricochets off the wall towards the goal mouth is another good attacking tactic. It's most effective in two-player mode.

INTERCEPTION!

To increase your chances of getting the ball just after its launch into the Speedball arena, point your controller in the direction of the launcher and tap your fire button. Nine times out of ten, you get possession - giving you an instant advantage!

SOCCER BALL

BEWILDERED GOALIES

In two-player games, psyche out the goalie by moving your player in possession around the goal area. The goalie's a lot slower than the attacker, and should he dive, the goal is clear. The computer goalie isn't so easily fooled.

GOALIES ON A STICK

When you're defending against some of the lethal attack tactics discussed in this tips special, remember one thing: keep your head! Don't dive unnecessarily. Instead keep your goalie in the centre of the goal, while edging some of your defenders back to the goal mouth. Only then have you a chance against your cunning opponent.

SEGA TIPS

牛詩集

MAKING A PASS

With two players in the opposition's area, simply passing the ball between them is enough to thoroughly confuse the goal keeper and make him dive. Once he's done this, an open goal is yours!

TIME WASTER!

If you've got the lead in a game of Speedball and want to keep it that way, time wasting is your best course of action. Passing, shooting and charging about earns you points, but gives your opponent the chance to steal the ball. Instead, just run around in circles, or if you're really making a mockery of opposing players, scoop up all the money and power-ups and plan a goal-scoring strategy from there.

MEGADRIIVE

TIPS

Tengen's version of Klax is probably one of the best versions of the original coin-op available! Klax is one of the best puzzles games ever devised, and there's plenty of secrets you should know if you plan to reach the end of the game! Here's a few of them...

HAVE YOU SCORED?

Scoring points is the most important objective in Klax, as any Klax wizard will tell you. Just remember that the more ambitious your klax, the more points you score. It's worth remembering that a vertical three-klax is worth next to nothing. Just use these to get yourself out of trouble.

FOUR-KLAX ACTION

Diagonal and horizontal four-klaxes are pretty easy to imagine, but how do you pull off a vertical four-klax? After all, the console makes the tiles disappear once you've made a three-klax. There are three answers to this apparently impossible task.

METHOD ONE

Slack two tiles of the same colour on top of one another, keeping the other two on the paddle. Produce another klax elsewhere, and as the score is added on, you'll notice a pause. During this pause, put the remaining two tiles on top, and there you have it - a vertical four-klax worth 10,000!

TIPS

MULTIPLY
THAT SCORE

The key to making a mockery of Klax and being that 'ard resides in the little-known score multiplier. As you probably know, when a klax is created the tiles disappear, causing the tiles on top to topple in down. Now, if you're really cunning, you can arrange the tiles so that when they fall they create ANOTHER klax - you get double points for this. Do it a third time and triple points are yours... and so on. Remember, the multiplier only comes into effect when you set up a chain reaction caused by the dropping of one tile.

SCORE TABLE

Check out this invaluable table for working out how valuable your klaxing efforts are.

Formation	Score
Horizontal 4-klax	5000
Vertical 4-klax	10000
Horizontal 3-klax	2000
Vertical 3-klax	4000
Horizontal 2-klax	500
Vertical 2-klax	1000
Horizontal 1-klax	100
Vertical 1-klax	200

THE TENGEN WALL

On levels one and two, there's a dead easy way to get over 265,000 points! Simply look at the photograph accompanying this box. Using this formation (called the Tengen Wall, because the programmers at Tengen discovered it while play-testing the coin-op!), you score for four vertical four-klaxes, one horizontal five-klax and a measly vertical three-klax! Impress your friends and confound your foes with this one!

METHOD THREE
Drop the tile down to make a diagonal three-klax. Once they've been scored they disappear and cause the two tiles on top to fall onto the bottom two and there you have it! 10,000 points for a vertical 4-Klax please (plus the score multiplier which doubles it up to 20,000) as well as the score for the diagonal (another five thousand points!).

REMEMBER
THE
DIFFICULTY
RAMPING!

Remember that if you're really keen on beating Klax, you've got to be fast! This is because the longer you play the game, the faster the tiles descend down the ramp. Even when the game is paused, the difficulty ramping remains active! If you're a hopeless spaz with the dexterity of a donkey, go to the options screen and select DIFFICULTY RAMPING OFF. If you do this, it's a lot more likely that you'll actually reach wave 99 and thus finish the game.

METHOD TWO

The second method gives you yet more points! Stack two tiles on top of one another and then start a horizontal klax on top. Put the other two tiles on top, and finish the horizontal klax. There you have it! Because of the effects of the score multiplier, you get double points for the vertical four-klax as well as the score for the horizontal one!

ULTIMA IV

GENERAL HINTS

Use these general hints to boost your Ultima-related fortunes.

Mandrake is found in the marshlands of the Bloody Plains and the fens of the dead on the darkest of nights. The Black Stone is trapped in the moongate of Verity Isle. Search for it at midnight. The White Stone is somewhere on Serpent's Spine. Use the balloon to search for it.

To find the balloon, discover the secret entrance in Castle Britany to the dungeon Hythloth and use an exit spell once inside. Look for a ship on Lock Lake, fight for it, and then search for the hidden village of Cove.

To find out how to enter the great Stygian Abyss, meditate three times each at the shrines of Honesty, Compassion and Valour.

The Buccaneer's Den - an island south of Lock Lake, is a great place to stock up on Black Pearl.

A couple more general pointers. Talk to everyone and note down important information. Give blood at the healer's shop in any town, village or castle to raise your virtue of service.

Angie Warren from Dartford sent in these tips ages ago. However, I only found the file they were in the other day! Still, it's all pretty useful stuff for anyone having problems with this decent RPG, so have a good butcher's at this, as they say.

CHARACTERS

Here's the complete list of characters that can be recruited to your cause in Ultima IV along with their

location and what virtue you must be proficient in order to persuade them to join your cause.

Julia the Tinker - Minoc (sacrifice),
Mariah the Mage - Moonglow (honesty),
Shamino the Ranger - Skara Brae (spirituality),
Geoffrey the Fighter - Thelom (valour),
Janna the Druid - Yew (justice),
Iolo the Bard - Britain (compassion),
Dupre the Paladin - Trinsic (honour),
Katrina the Shepherd - Magincia (humility).

Stephen Pearce from Abbeywood in London was just one of around twenty readers to send in the tips necessary to get you to the Coin World of this Tecmagik arcade conversion. It's pretty simple. Just select Blacktown and carry on with your Pac-gobbling as usual, but DON'T eat up any of the power pills. Once all of the small pacs are gone, a large pill should appear. Eat this up and you enter the secret level known as Coin World!

TIPS SUPER TENNIS

ワールド
サーキット

Just to prove that he was hard, Gerald Donovan (for it is he) actually faxed us this valuable info for Super Tennis. Try out this pretty neat code to get you to the last championship (with the largest possible amount of championship points!). Gerald also gave us a cheat to make the game a lot easier, but his bizarre handwriting made the resulting message indecipherable - perhaps he'd like to send it again...?

K8XD3HR FTLWJPC
ZGNYBQ1 4065C6P
DJSTK8X D3HRFTL
WJPUKMW IGG

R•TYPE

TM

Gary Young of Erith in Kent is a cunning little fellow. He's sent in a level select cheat for Irem's stunning Super Famicom shoot 'em up.

First of all, on the title screen, press **SELECT** for the options. Press the **RIGHT** button (that's the button on top of the pad) nine times, then press **UP** nine times. You should hear a sound. Now exit and play the game and pause it. Now press the **RIGHT** button, **SELECT** and button **A** simultaneously a few times until a little 01 appears instead of the skill level. Now you should be able change the level you're playing on - yeah!

AUGUSTA OPEN GOLF

Gary Young from Erith in Kent sent in some level codes for this graphically stunning, but pretty slow moving golf game. Try these out:

L3FHPOZNGW

ACCESSORIES FOR THE GAME BOY

GC17

Game Light Plus
Game Light and Magnifier in one, adds security onto your Game Boy, slides off easily. Double magnification and improves screen visibility.

GC12

Attache
Protection case with interior organizer with multiple compartments to hold Game Boy, Game Light, Amplifier, Magnifier, Power Pak, Game Light Plus, AC DC Adapter, Car Adapter, Car Phones and other accessories.

GC10

Game Boy Holster

- Innovative accessory holds Game Boy and one extra game pak.
- Clips to belt and can be carried anywhere.
- Rugged, high impact construction compliments Game Boy's.

GC 5

Game Light
Great in the car at night. Improves visibility and contrast in dark and dim light.

GC13

Game Boy Car Adapter
Lets you power your Game Boy off your car battery. 3 wires cord reaches the back seat of most vehicles.

GC6

Game Boy Magnifier
Double magnification makes viewing easier and playing twice as exciting, bringing the action closer.

GC7

Game Boy Amplifier
Micro amplifier plugs directly into your Game Boy, improving sound and increasing your fun.

GC15

Game Boy Mains Adapter
Lets you power your game boy off household current. Convenient 3 metre cord connecting directly to your standard outlets enables you to conserve your batteries.

GC2

Game Boy Carry Case (Hard)
Safe convenient storage for your Game Boy, Game Paks, headphones and video link.

GC3

Game Pak Carry Case (Soft)

- Holds 12 Game Boy Game Paks.
- Durable, compact case protects and organizes games during transport and storage.
- Double stitched construction with mesh woven carry strap lets you take your games anywhere.

GC8

Play and Go Carry Case
Play on go with this stylish leather look travel case that holds your game boy plus 4 Game Paks.

GC18

Game Boy Cleaning Kit

- Easy to use - extends the life of Game Boy and game paks.
- Cleaning cartridge removes dirt and build-up from Game Boy controls.
- Special wound cleans contacts in game paks.
- Comes with extra cleaning cord for cartridge and replacement tips for wand.

GC9

Game Boy Power Pak

- Enables Game Boy to be used on the move.
- Plays onto back of Game Boy to clip.
- Plugs into wall to recharge.
- Includes rechargeable batteries.

GAMING ON THE MOVE

Checklist
To ensure you're not missing out on any of the great Game Boy, Mega Drive, NES & Game Gear accessories here is a list of the range available. Why not tick them off as you collect them.

GAME BOY

- Game Light
- Attache Case
- Game Light Plus
- Game Boy Holder
- Game Boy Car Adapter
- Game Boy Magnifier
- Game Boy Amplifier
- Game Boy Mains Adapter
- Game Boy Carry Case (Hard)
- Game Boy Carry Case (Soft)
- Play and Go Carry Case
- Game Boy Cleaning Kit
- Game Boy Power Pak (inc. rechargeable battery)

MEGA DRIVE

- Mega Drive Soft Pack
- Mega Drive Cartridge Caddy
- Mega Drive Carry Case

NES

- NES Soft Pak
- NES Cleaning Kit
- NES Game Caddy
- NES Extendable Cable

GAME GEAR

- Game Gear Play n Carry Case
- Game Gear Attache Case

SEGA

TIPS

Super Kick Off is THE best soccer sim for the Sega Master System, rated at 96% in the November issue of MEAN MACHINES. However, coming up with cast-iron goal-scoring tactics can be a bit of a pain, so we set Computer and Video Games' Kick Off champion, Paul Rand, on the case...

GOALS OF THE STARS

Each of the following work using a 4-2-4 tactical set-up, although they should be just as lethal using the 4-3-3 formation. The important thing to remember is that the radar plays a significant part in all of these moves, use it at all times to track your players and, just as important, the positions of the opposition.

THE IAN RUSH

Probably the easiest, and most annoying to the opposition, this goal is scored from either end of the pitch.

From the kick-off, pass the ball back to your central defender. Now, watch the radar and you will see that the opposing team move towards the ball, leaving your striker all alone and able to move toward the other team's goal. When there is sufficient space between your striker and the opposition's defence, lob the ball long and high, over the top of the midfield, to land right at the feet of your number nine. Position him so that he is more or less in the centre of goal, at the eighteen yard line. Then nudge the ball slowly forward - don't run with it at your feet - and let it roll but not too far away from you. Keep doing this until the opposition keeper is in view. He should come for the ball at this point, at the exact same time, run at the ball and kick it straight, applying slight left or right aftertouch depending on the keeper's position (if he's to the left of the ball, use right aftertouch and vice versa). The ball will fly right past the keeper, who will dive, miss allowing the ball to crash into the back of the net!

MEAN MACHINES

THE DEAN SAUNDERS

This method works when the striker is too central to the goal for the keeper to wander too far out of position. Again, this works at either end of the pitch and from any wing, but this explanation is for kicking up the pitching and from the left wing.

Use exactly the same set-up play as described previously, but instead of the striker shooting at goal, pass the ball to the man directly to the left of him. Carry the ball slightly forward and shoot diagonally up-right. If the keeper is very close to you, or if you are very near to the post, apply hard left aftertouch. A goal will be scored around fifty percent of the time.

SEGA
TIPS

THE GARY LINEKER

This method works whether the set-up is made from either the left or right wing and at either end of the pitch. The description here explains the move travelling up the pitch, starting from the left wing.

Allow the keeper to pass the ball to a defender instead of hoofing it into the midfield. Immediately take the ball over to as far left as possible - you will notice from looking at the radar that the majority of the opposition is heading in the general direction of the ball. Carry the ball up to the midfield, staying on the left wing, and keep a careful watch on the radar. As soon as you see a spare man on the right wing, kick - don't pass - the ball to him. By the time the ball reaches him it should have slowed significantly, allowing him to reach it with ease. Do not trap the ball, just try to ensure that the action of catching the ball and running with it is achieved in one flowing movement. Run directly up the screen, watching the radar for a striker breaking loose into the six-yard area of the opposition goal. As soon as you are roughly in line with the striker, trap the ball and pass it to him. While this pass is taking place, the keeper will already have started to come off his line, so the final move must be executed quickly. Immediately after your striker has received the ball, kick it at the goal, applying aftertouch in the direction of the post which you are closest to. The keeper will be totally out of position, leaving the ball to fly over the line for an simple goal!

CLASSY
CORNERS

Corners are notoriously difficult to score from - unless you use these foolproof tactics! The first method shown is for corners taken at the top of the screen.

The nine boxes shown when a corner is given represent kicking directions. The trick is to successfully gauge the strength of the ball over the pack and placing it right at the feet of a lone forward. Immediately shoot diagonally up-left to send the ball flying toward the net - with a fifty-fifty chance of the keeper missing the catch.

A different method needs to be used when corners are taken from the bottom end of the pitch. Choose the bottom-left box if you're taking the shot from the left side, bottom-right for the right side. Keep the button pressed for just over half a second, to get the correct height and power. Now, the

split-second before the player takes the corner, apply downward aftertouch. What should happen is the ball should arc tightly toward the near post, where one of your forwards is free to head diagonally - if timed correctly the player will meet the ball before the keeper, sending it soaring into the goal!

THE MANAGER'S
GENERAL TIPS

Always use the radar! Take a split-second glance regularly to check on what is happening on the pitch: if you don't know where your players are, you're up a certain creek without a certain instrument.

Anticipate moves. If you're kicking to a player quite a way away from you, make sure you're prepared to take the ball and run.

Keep the ball moving. If you don't, the opposition will take it from under your nose - and if you're playing against the computer, that can spell disaster.

Get rid of the joystick. Super Kick Off is a much more controllable and enjoyable game when played with a good joystick.

Practice! The goal-scoring methods given here have been worked out over months and months of intense playing. It shouldn't take that long for you to learn them, but if you want to win consistently, be prepared to sit and work at mastering each one.

Experiment. The goals described here are only a small selection of those which can be scored. Part of the fun of Kick Off comes from developing a style of your own - just use these to ensure you win!

Get a friend! Kick Off is great against the computer, but there isn't a game in the world which can come close to Kick Off in two-player mode. And that's OFFICIAL!

THE NIAL QUINN

This method works best when kicking up the field, but can sometimes be effective at the opposite end of the pitch.

Carry the ball up either wing, until you are in line with the six yard box. Stop, turn and chip the ball into the six yard area. As the ball is in the air, position a player directly underneath it. Depending on where the ball lands, you can perform one of two actions. If the ball bounces in line with the near post, kick it diagonally towards the goal as it makes contact with the ground and apply aftertouch. If the ball is still in the air as it comes into line with the centre of the goal, let it drop slightly then head it diagonally toward the far post.

SHADOW D

Julian is back and this time he's brought his dog. Well, he should have done, but it appears to have gone for walkies in this version, despite showing its face on the title screen.

Still, you don't need a canine chum, because you're a rock-hard ninja warrior out to crush the power hungry Zeed empire and their armies of terrifying minions. This means you must first stow away on a heavily-guarded aeroplane bound for the Zeed home country and then fight your way across Zeed-infested landscapes until you reach the final encounter with Emperor Zeed himself!

Shadow Dancer is a horizontally-scrolling platform beat 'em up in the traditional Shinobi mould. The player leaps about killing his enemies and avoiding the many traps and hazards they have placed in his way. At the end of every level, a giant boss appears, ready to beat the cack out of Mr Mushashi - but you've got special ninja magic with which to repel their aggressive tendencies!

NOT A LOT

Ninjas don't spend their entire lives being taught how to chop people up - they are also instructed in the ways of three deadly ninja magics. There's fire, which bathes the warriors enemies in flames, air, which launches fatal whirlwinds nasty-wards and finally spirit, which summons a religious figure, thus Buddha-ing Joe's opponents into submission.

COMMENT

I didn't like the Megadrive version much, because apart from the dog, it had nothing new on offer and the game simply wasn't anywhere near as good as Revenge of Shinobi.

JULIAN

On the Master System, Shadow Dancer fares better, but even so I'm still left with a nagging doubt.

Getting to each end-of-level boss is easy, but until you work out the method and magic required to do them away, you get stuck. Once you finally succeed, you go straight through to the next boss where you get stuck again, making progress rather sporadic and frustrating. A shame, really, because otherwise this is a fine game with good graphics and plenty of variety. Ardent Shinobi fans might enjoy it, but at the end of the day my overall feeling is that with a few more gameplay tweaks, this could have been so much better.

▲ Hiii-yaaaa! Just a few shurikens and this gun-toting marauder should finally bite the dust!

DANCER

▲ Leaping between platforms is achieved by pulling off one of these spectacular leaps. Cor!

TIN-NINJA ALLEY

After each level, the player is given a bonus level, granting the opportunity to earn extra lives! The level is seen through Joe's eyes as he stands at the bottom of a tower, with ninjas climbing down to kill him. If he picks off all the ninjas before any one of them reaches the ground, an extra life is his for the taking.

▲ Getting down with Joe Mushashi!

▲ Joe's besieged by enemy fire.

COMMENT

RAD

The absence of any canine characters in this conversion of Shadow Dancer doesn't really effect the game much, but what does stop it from being loads of fun is the difficulty level. The levels themselves are quite easy, but the guardians are ultra-rock-hard, which leads to more than a little frustration. This is a pity, because otherwise, Shadow Dancer is a fun game to play, the graphics are quite good, with some especially nice animation, and the levels are varied enough to stop the whole thing from getting boring. Anyone considering buying Shadow Dancer would do well to try it out first.

SHADOW DANCER

BY: SEGA

PRICE: £TBA

RELEASE DATE: TBA

GAME DIFFICULTY: MEDIUM

LIVES: 3

CONTINUES: 0

SKILL LEVELS: 1

RESPONSIVENESS: SPEEDY

PRESENTATION 54%

No options, but the title screens aren't too shambolic.

GRAPHICS 81%

The sprites are nicely animated and the backdrops are fine.

SOUND 58%

The awful "barking" on the title screen sets the tone for a multitude of lacklustre effects and tunes.

PLAYABILITY 72%

Easy enough to get started with and nicely responsive, but the varying difficulty level is off-putting.

LASTABILITY 67%

The bosses should give you trouble for a while, if you don't hurl your joypad through the screen first!

OVERALL 71%

A potentially great Shinobi game let down by a poorly graded difficulty level.

Mario is back and this time he's not taking any mushrooms. That's because the Mario in question is in fact the NHL ice hockey star Mario Lemieux. As you may have guessed, this means the game is a simulation of the fair sport of ice hockey, complete with sportsmanlike features such as fouls and even fistfights! The action is viewed side-on, and there are close-up screens of certain aspects of the action - such as fistcuffs!

However, despite these violent touches, ice hockey actually has rules. The game is played with two teams of six players. Each of these is armed with a curved wooden stick with which to strike the puck. Should the puck be touched by anything other than the player's stick, a foul is awarded to the other team. The only exception to this rule is the goalkeeper, who can stop the puck with whatever he likes, although should he hold on to it for too long a face off is awarded on the offenders' penalty spot.

Plenty of options abound in this game.

MARIO LEMIEUX

PUCKING OFF

Face offs are used on a number of occasions. To start with, they are used to decide who gains possession at the beginning of the game. Once again, the action is shown close-up in a one-on-one scene. The puck is dropped between the players by the referee and the first one to flick it back to his team gains possession. Face offs are also used to decide fouls, such as a holding offence by the keeper. Each team has two penalty spots, located at short diagonals from each goal mouth. The face off is held near the goal of the offending team, so should the attacking team who have been fouled against gain control, they are in an ideal position to score!

COMMENT

The obvious question is how well does Mario stand up to EA Hockey? Well, not all that badly, as a matter of fact. The close-ups are an improvement over the EA formula, and mastering the light and penalty sequences especially takes some doing. The main game is quite speedy, although the automatic player selection is a bit dodgy. The graphics are okay, but the sound is awful, with a few bars of a dying tune squeaking up at moments of tension and hardly any sounds effects to speak of. Mario Lemieux is a fine game, more challenging and harder to master than EA Hockey, but without quite the smoothness of gameplay of the Electronic Arts game, or the atmosphere that gave EA Hockey its sense of realism. Worth a look, but EA Hockey still reigns supreme.

RAD

Plenty of near-the-goal mouth action here. Can you score that winning goal? Or will you completely spaz it up?

SCRAP ON

One of the more popular elements of ice hockey is when a couple of the players have a bit of a rumble. Having seen the potential in this, the programmers of Mario Hockey have added an arcade beat 'em up sequence in which you take on your opponent. A number of offensive moves are available, such as jabs, hooks and uppercuts as well as a selection of defensive moves, like retreating, dodging and ducking. Some teams are better in a fight than others, so make sure you know what you're up against before starting something!

ICE HOCKEY

Three players close in on the puck, while the rest of the players wander about aimlessly. Strange...

The players skate about aimlessly, painfully oblivious to the fact that no one has the puck!

MEGADRIVE

PENAL HILARITY

4 The sports commentator appears on-screen occasionally to liven up the proceedings a bit

COMMENT

JULIAN

After much play, I've come to the conclusion that EA Hockey still rules supreme, but Mario Lemieux Ice Hockey certainly gives it a good run for its money. Mario is tricky to master, packed full of excellent features, but is unfortunately marred by the annoying player selection - when you pass, the computer sometimes chooses a player away from the puck which results in you being intercepted and your attack completely breaking down. Very irritating, especially if the computer team scores! Apart from that, Mario Lemieux Ice Hockey is a very comprehensive simulation of the sport which features impressive stats screens and some neat touches. It should definitely appeal to fans of the sport - but check out EA Hockey before you buy.

The third and final close-up sequence in Mario Lemieux is that of the penalties. First off you see a team-mate passing the puck to you from one corner of the screen. Then you must quickly decide where to post the puck to best fool the keeper. Timing is essential, as just the tiniest delay causes the puck to stop dead on your stick or even whizz harmlessly underneath it!

SLAVE STATS

There are more stats contained in Mario Hockey than you could shake a whole forest of sticks at and you don't even have to wait for the end of a period to see them! Pausing the game brings up the first page of stats, and pressing left or right cycles through them. If you fancy seeing how your goalkeeper's performing, how good your pass coverage or blocking is or even who scored each goal, just pause that game and away you go.

FOR A MAGICAL WORLD OF FUN & GAMES FANTASIA

REVIEW

YOUR FIRST PROBLEM

Funnily enough, actually getting off the first screen in *Dragon's Lair* is a real test. Dirk is faced with a never-ending supply of bats to blast, as well as a bridge with many holes in it to successfully negotiate. But that's not all because the moat contains a nasty serpent-like creature just waiting to dust Dirk's monkey ass. Rather bizarrely, killing the moat creature actually opens the door and gives Dirk entry to the castle.

COIN-OP THRILLS

Dragon's Lair was originally a laser disk coin-op that appeared throughout arcades during 1984. It featured stunning animation sequences from the talented hands of ex-Disney artist, Don Bluth, and as you would expect, was something of a visual feast. However, the gameplay was extremely shallow, boiling down to being an exercise in pushing the joystick in the right direction at the right time.

COMMENT

Dragon's Lair is the gaming equivalent of a beautifully garnished cack sandwich. It looks absolutely delicious on the outside, but once you taste what's inside you feel rather ill. It looks and sounds impressive, with large, superbly animated graphics and some neat tunes. Once you play it, though, it's true villainess is swiftly revealed. It seems like a platform

game at first, but it's not - it's a slow-paced multiple choice trial-and-error game where you have to solve each situation by using critically-timed presses of either the directional pad or the fire buttons. Dirk doesn't move fast enough to escape death if he makes one false move (he moves one slow pace at a time) so you have to remember every single correct step through the entire game and execute each one perfectly to succeed. Because you basically have to do exactly the same thing every time you play, it doesn't take long for this strict routine to become utterly, utterly tedious - especially since progress is made unbelievably frustrating due to the often illogical and stupid combination of moves required to succeed. After a couple of hours I was seething with annoyance and felt like smashing the cartridge to bits! I can see that the programmers have tried to capture the flavour of the 8 year old coin-op, but at the end of the day it's all been a completely futile and pointless exercise. *Dragon's Lair* was never recognised as being a playable game; it was merely a fairly fun semi-interactive cartoon experience whose novelty swiftly wore off. Why didn't the manufacturers make it into a platform game like the Gameboy version? At least that was fun and playable. This thing is simply the most dire console game yet seen in the MEAN MACHINES offices and should be avoided at all costs.

DAGGER SKILLS

Dirk isn't completely defenceless against the evil that lurks within the dragon's lair. His rucksack has mystical dimension-warping abilities, which make it possible for Dirk to keep an infinite supply of daggers at hand. These are pretty handy against bats and the like, but larger foes such as snakes require more than one hit to successfully dispatch.

ON'S

COMMENT

Let me start by saying that I hate this game intensely. Not since the god-awful Shadowgate have I wanted to perform various violent acts to an inanimate object like a Nintendo cartridge. Dragon's Lair is a shambles. It's not the graphics. These are fine, with excellent sprites and some outstanding animation. The sound isn't great, but I've heard far worse issuing forth from the Nintendo.

RICH

No, what really makes me despise this game is the fact that it's so frustrating to play I was screaming within minutes. The first screen is a cave in point. Dirk falls through one-inch holes in the floor (his feet are actually bigger than the holes!) and opens a castle door by shooting a creature in the castle most (???). Once indoors, things get no better. Progress is almost always rewarded by instant death - getting further into the game is just a case of remembering EXACTLY what to do and when. One false move and Dirk's dead meat. Almost everything that makes me immediately dislike a game is here by the bucketload. In fact, I hated every minute I spent "playing" it.

THE LIZARD KING COMETH

The Lizard King is a bit of a dab hand at the old magic, and comes up with many tricks to fool the bumbling Dirk. His dirtiest trick is to make clones of himself and place them around his domain. Around ten direct hits with Dirk's sharp, dagger-like objects are required to kill these energy-draining duplicates.

REVIEW

MERCERS

Poor old Mr Reagan. He's finished being president of the USA, but still those terrorists won't leave him alone. They've gone and kidnapped the senile old duffer and are threatening to kill him if all America's nuclear missile codes aren't handed over to them. Obviously, the government aren't going to waste any of their proper soldiers on the inevitable rescue bid, and so they hire you, a top mercenary, to do the deed.

This means you wander up the screen in the style of the old game Commando and shoot everything. This includes enemy soldiers, enemy tanks, enemy jeeps and even enemy trees! A fair smattering of collectables are yours for the taking, should you find them, and these should doubtless aid you in your battle against a huge piece of war machinery at the end of each level, such as fighter planes, battleships, helicopter gunships and a giant bomber.

Can you save the ex-president and dispose of the terrorist threat? Remember, the entire free world is depending on you.

COMMENT

This conversion of Mercs is well decent, with some of the smoothest scrolling I've seen on the Master System. The action is tough and addictive, with

JULIAN plenty of things to blow up and enough enemies to make life difficult and death rather easier! The graphics and sound aren't outstanding, but it's the gameplay where this is strongest, and there's certainly plenty here to keep a Master System blastaholic happy for quite some time.

Watch out for this helicopter's cannon of doom!

MEGACRASH!

Should those African revolutionaries gang up on you in frightening numbers, one press of the B button unleashes a Megacrash smart bomb, annihilating everything in the area! These bombs also cause grievous bodily harm to any armoured vehicles or end-of-level bosses hanging around us to no good.

IT'S NOT QUITE A PORSCHE

Dotted around the landscape are abandoned enemy vehicles, just waiting to be commandeered by the player. Once you're in, these vehicles protect the player from a number of hits before exploding. Jeeps, rafts and tanks are just a few of the vehicles found throughout the game.

▲ A Megacrash is unleashed upon an unsuspecting warship!

SEGA

REVIEW

COMMENT

I must admit that I was pleasantly surprised by this version of Mercs. The scrolling is super smooth, there are plenty of things to shoot and some cool power-ups to collect. The graphics are

RICH

good with plenty of variation between each level, and the sound, although not brilliant, is pretty functional. The only problem I really have with it is that there's not much in the way of enemy soldiers to blast in oblivion, and some of the bosses are a tad weedy to say the least. However, although it has its faults, there's no denying that Mercs is very enjoyable, and well worth investing in if you're after a decent shoot 'em up.

▼ A fight to the death! Dramatic, isn't it?

▼ This merc is pretty angry,

PACKING A BIG WEAPON

Our rock 'ard Merc is certainly well-endowed in the weapons department. Check out this lowdown of mega-destructive weaponry!

SHOTGUN: Fires off highly destructive armour-piercing shells. Very impressive.

MACHINE GUN: Rapid-fire weapons don't get much better than this.

FLAME THROWER: The most powerful short-range weapon. Flaming tasty.

ROCKET LAUNCHER: Takes a short while to reload, but very powerful indeed.

A rather sad attempt at two of the coin-op's tunes, along with mundane effects.

PLAYABILITY 84%

Plenty of blasting action that's very addictive to begin with...

LASTABILITY 80%

...and pretty difficult as well, meaning that there's quite a lot of play to be had from this one.

OVERALL 81%

A good conversion of an outstanding coin-op that should appeal to anyone after a decent shoot 'em up.

REVIEW

RAMPA

Aaarr me hearties! It's the 16th century and war is being waged - which is bad news for you. The problem is that you're in charge of fortifications and cannon operation on an island which is being invaded by an armada of greedy Spaniards. This means it's up to you to repel their fearsome water-borne attacks with accurate cannon fire, whilst keeping the fortifications around your castles in good enough order to keep the invading soldiers out.

Ramparts is a conversion of an Atari coin-op which enjoyed moderate arcade success recently. It's best described as a cross between Tetris and the ancient arcade classic Missile Command. Play alternates between a two-part strategy section, where randomly shaped wall sections must be linked together to completely surround your forts and then cannons ingeniously placed for maximum firepower. Then it's shoot 'em up time with the cannons being aimed at incoming vessels using crosshair sights. Destroy the entire invading fleet and the island is safe.

MASTER BAY TOUR

Four bays must be successfully defended in Ramparts. Each bay has three forts, one of which you pick. The fort is fully fortified, and there is room for four cannons. At the end of each attack wave, extra cannons are awarded for the amount of territory you have managed to successfully defend. Therefore, your main aim should be to link all of the forts together with wide squares of walls, thus providing maximum bonus cannons and top firepower.

▲ Territory points are awarded according to how much land you've enclosed.

OH FRIGGATE!

The ease or difficulty of the puzzle section depends upon your performance in the arcade level. A varying number of opposing ships sail towards your bay, launching cannonballs as they go. The player is armed with a deadly crosshair sight with which to aim his cannons. There can only be as many shots on screen at a time as you have cannons, so it is important to get your aim right. The ships constantly close in on you at great speed, making accurate shooting difficult. Damaging ships with an accurate hit is a good way of slowing their progress, but it's all over for any sea vessel on the receiving end of two direct hits!

BRICKING YOUR LOAD

It's inevitable that at some time during the game, one of those pesky frigates will score a hit on your defences. Luckily, repairing these blows is what the strategy section is really for. Linking bits of wall together might sound like a bit of a jape, but those medieval architects have obviously never heard of blueprints. The wall blocks are completely random shapes, and you must repair all chinks in the walls within a strict time limit. If there are any gaps in your defences, you are done for and it's game over!

RAM A PART TODAY

Ramparts can be played by either one or two players simultaneously. In two-player mode, each participant controls a castle and must face the same opposition. By rights, this should make things easier, but there's still territory to consider. As there are two of you occupying the same space, it means half as much expansion room for each of you unless you steal some from the other player! This means it's the quickest thinker who wins the day with their undoubtedly superior land ownership.

COIN-OP PIRACY

Ramparts first appeared in arcades at the beginning of last year. Its combination of play styles assured it cult status, although it never achieved the huge success of other Atari machines. If you can track down a Ramparts machine in an arcade near you it's definitely worth a few goes.

▲ Destruction points are awarded according to how successful your cannon-related activities are. This score (3,089) is particularly good.

COMMENT

JULIAN

setting. The graphics and sound aren't anything to home write about (the ones on the arcade original were pretty pathetic too), but in the playability stakes Ramparts is superb, offering an entertaining, addictive and long-lasting challenge (especially with two players) which should be checked out.

SEGA

REVIEW

COMMENT

RAD

Whatever else you say about Ramparts, it certainly is original. The blend of arcade shoot 'em up and puzzle action seems bizarre at first, but it's really a lot of fun. The controls are responsive and the action comes thick and fast. The graphics are very colourful, although a tad blocky and the sound is below average with a bog standard tune playing throughout and a few dingy effects. If you really want something truly different that will tax both your brain and your reflexes, Ramparts is the cart for you.

ABOUT COMPUTER GAMES**

WE ARE.

Whilst browsing through Uncle Scrooge's library one afternoon, Donald chances upon a book about the treasure of King Garuzia. Apparently, the man Garuzia had hidden his most treasured possession somewhere on our planet. Fortunately for our duck hero, he's also left a map detailing clues as to the whereabouts of said treasure. Donald dances around, proclaiming to the world how rich he could be, unaware that outside the window, Big Bad Pete and his gang are listening, intent on making the map their own! The mobsters make a grab for the map whilst Donald is on his way home, but the quacking one escapes... for now.

Donald Duck is a horizontally scrolling platform game in the style of Mickey Mouse. Donald travels across the world finding the treasure, often getting involved in sub-missions along the way. If Donald can beat all ten levels, the treasure is his.

▲ Watch out Donald - it's a long way down!

▼ It's very spooky in Drac's domain.

QUACKSHOT

Everyone knows that Donald has a fearsome temper, so Duck fans won't be disappointed to see this represented in Quackshot! Every time Donald partakes of a chili pepper, his temper gauge rises one notch. Eat five chili peppers and Donald is pushed over the edge into an uncontrollable fit of rage. During the short time for which Donald's temper is flared, he becomes invincible, thus easily mashing any baddies who get in his way.

TASTE THE PAIN

HOT

COMMENT

Visually Quackshot is fab, with superlative sprites and stunning backgrounds giving it an almost cartoon-like appearance.

JULIAN However, the gameplay is a bit of a let-down. It's fun to play, but the problem is that the action is a bit too slow-paced for my liking, particularly on the early screens. If you can get far enough things get tricky, but never really difficult - and that's my second moan. The game is no tougher than Mickey Mouse, so anyone who's already played a couple of Megadrive platform games should be able to complete this within a few days. Quackshot is an enjoyable game, but the rather low difficulty level means that it's more suited to new Megadrive players rather than experienced ones.

Every time Donald reaches a checkpoint he plants a flag which allows him to return to that precise location. At the checkpoint, Donald can call on his nephews, Huey, Dewey and Louie to pick him up in their plane and whisk him off to whichever location he desires to tackle next, apart from the secret island of course!

THE FRIENDLY SKIES

Donald is quite an athletic sort - not only can the big D waddle around for hours on end, he can also sprint at the touch of a button, leap tall... er... blocks in a single bound and even slide along on his stomach to avoid low-flying meemies!

DUCK DOWN

REVIEW

PEACHY TOOLS

Donald has a variety of tools at his disposal with which to complete each level. He starts the proceedings with a yellow plunger which can be thrown at enemies to freeze them for a limited period of time. Next comes the red plunger, which sticks to walls, allowing Donald to form makeshift ladders. Finally, Donald can obtain a green plunger which sticks to flying enemies without freezing them. If Donald can jump onto a plunger thus affixed to an aerial nasty, he can hitch a ride over impassable pieces of terrain. Donald also has access to a bubblegum shooter, which has limited ammunition but comes in handy for destroying scenery, and a popcorn shooter, which sprays five deadly kernels of corn at Donald's enemies, providing he has enough popcorn to do the job!

Donald's in dangerous territory.

IT'S BUBBLEGUM SHMO.
WHEN YOU USE IT IN
YOUR SHOOTER, IT
MAKES EXPLODING
BUBBLES.

WARNING: using bubblegum on your shooter can lead to serious health problems.

COMMENT

The graphics in Donald Duck are absolutely brilliant and they match those of Castle of Illusion.

However, the gameplay falls short. The action is too slow, even when Donald is sprinting, and there isn't enough happening on screen to set your pulse racing. Don't get me wrong - Quackshot is a jolly game, but I found the lack of excitement and the rather plodding nature of the game a bit of a disappointment. Maybe this is better suited to younger Megadrive owners?

RAD

▲ Watch out Donald - it's a long way down!

IF YOU CAN DEFEAT THE
TIGER IN THE GARDEN,
I'LL REWARD YOU WITH
THIS SPHINX TEAR.

▲ A bizarre proposition for Donald Duck.

BY: SEGA

PRICE: £39.99

RELEASE DATE: NOW

GAME DIFFICULTY: EASY

LIVES: 3

CONTINUES: INFINITE

SKILL LEVELS: 1

RESPONSIVENESS: FAST

PRESENTATION 90%

Superbly presented. Lots of animated intros, intermission screens and options.

GRAPHICS 95%

Stunning looking, beautifully animated sprites and gorgeous backgrounds make Quackshot a visual treat.

SOUND 80%

The effects are quite good, but they're spoilt by the mediocre tunes playing over them.

PLAYABILITY 83%

The slow pace and lack of immediate action makes this seem rather dull at first...

LASTABILITY 81%

...but things get much better as you progress. Towards the end there's plenty to test your platform skills.

OVERALL 83%

A stunning-looking, slow-paced game which offers plenty of fun, but might not offer enough challenge for experienced Megadrive players.

081-343-0419 (3 LINES)

Uncle Scrooge McDuck had a fine birthday present for Donald Duck's mischievous nephews. For each of them, he had a special lucky dime with which they should be able to make their fortunes (just like Scrooge did when he was but a mere duckling). Huey, Dewy and Louie had expected a big stack of toys for their birthday, but to be given a mere ten cents was a slightly disheartening experience.

The evil witch, Magica de Spell, seized this opportunity to catch her prey off guard and suddenly kidnapped them, dimes and all. But that was not the end of her evil deeds for she also pinched Scrooge's original Lucky Dime into the bargain. "Ha ha ha!" she laughed diabolically, "With all of these lucky dimes I shall soon be the richest person in the entire world! Ha ha ha!"

With Magica de Spell's mocking laughter still ringing in his ears, Donald Duck sets out for the inevitable rescue attempt. This is where you come in, guiding Donald around the eight-way scrolling platform environment, smashing the seven shades out of every enemy sprite that dares molest him on his travels. At the end of each stage, Donald is accosted by an evil end-of-level boss. Only multiple bottom bounces from our hero sees these evil demons off and enables Donald to attempt the next stage.

There are seven levels of platform action. The first three are selectable and in these Don rescues his imprisoned nephews. Only when they are free can our Donald have access to the next three levels, where the duck-like creature locates the missing dimes. With the dimes and the nephews safely reappropriated, Donald speeds along to the final confrontation where he uses his speed, skill and cunning to give Magica de Spell's monkey ass the most painful dusting seen in the entire history of Duckberg!

DUCK ME SIDeways

Donald Duck is one of the most spritely heroes yet seen on the Master System. He zooms about at a fair old lick and has colossal jumping abilities. He's also well-armed, starting the game with a massive mallet that's used to squash any evil sprites. Later power-ups give him spinning frisbees and boomerangs for taking out enemies at a distance. Just like Mario and Mickey Mouse, Donald can also squash his enemies by jumping on them!

DONALD THE LUCKY

D DUCK: DIME CAPER

SEGA

REVIEW

牛詩集

COMMENT

Donald Duck has all the hallmarks of a Disney game, from the lengthy story intro to the cutesy cartoon enemies. The graphics are great! The Donald sprite looks and acts just like the "real" thing, and the action is accompanied by reasonable sound. As always, it's the gameplay that makes or breaks a game and fortunately Donald Duck is very playable. It's also very difficult to beat with a number of long and tough levels. If hard games are your bag or you're just looking for a top quality platform game for your Master System, rush out and grab a great deal at your local software person until they hand over a copy of Donald Duck: The Lucky Dime Caper.

RAD

DUCKING HELL

Every so often, Donald runs out of platforms to jump around on and is forced to leap into the water to continue his adventures. Funny enough, considering that he's supposed to be a duck, Donald's underwater agility is rather sad and dodging the meanies is quite difficult. However, on the bright side, these underwater levels contain many bonuses to help Donald on his further travels.

NINTENDO REVIEW

A DUCK IN PUBLIC

If this game appeals to you Game Gear owners out there, you'll no doubt be over the moon to discover that a hand-held version is planned for release early on in 1992. It has exactly the same graphics and sound, but the pace of the game has been jacked up to almost manic levels. Look out for this - it's going to be MEGA!

MEAN MACHINES 78

COMMENT

Mickey Mouse was the greatest platform game a Master System owner could ask for - but Donald Duck is better still! The game concept remains much the same as Mickey - even down to

RICH

bottom-bouncing the meanies, but the graphics are much better and there's plenty more in the way of variety between each level. The sprites are just terrific. Donald himself is perfectly reproduced on the Master System (even down to his temper tantrums) and some of the backdrops are truly exceptional. The end-of-level bosses are graphical delights - far larger and nastier than their Mickey Mouse counterparts. The speed of the game is also several notches higher than Mickey Mouse - Donald burns around the platform landscapes like a duck possessed. Just like Mickey Mouse, there are plenty of hidden bonuses to be located too. Indeed, great skill is needed to locate and collect the 1-Up on the first level. Although Sonic is faster and prettier, Donald Duck is harder and the gameplay is far more interesting and exciting! In short, the perfect game to squander your remaining Christmas cash on!

REVIEW

It's not an easy life, y'know. Take Bub and Bob, for example. One minute, they're their normal selves, the next they're bubble-blowing dinosaurs! Who could have performed this dastardly deed? Only the not-very-nice Baron von Blubba, that's who. To regain their human forms, the two dingo dinos have to travel through 100 levels of madcap platform action and confront and destroy the Baron himself!

This is by no means an easy task, though, as the Baron has his hordes of minions waiting to dispose of any bronto that might get too big for its bubbles, and each has its own way of dishing out the devastation.

The bad guys don't have it all their own way, however - they can be blatted by blowing a bubble at 'em, then butting the bubbled beastie (try saying that after a few barrels of Old Flatulence Bitter!)

As the dinos progress through the game, the screens get tougher and tougher, and the enemies increase in speed and intelligence. So you'd better give your bubble-fingers a work-out!

BUBBLE BOBBLE

▲ This wave is MEAN!

◀ Who says romance is dead?

COMMENT

Bubble Bobble may be about a million years old, but there must be something in it because Sega have finally chosen to convert it to the Master System. The graphics are quite jolly, although there is some horrendous sprite flicker near the top of the screen when there's a lot going. Sound is likewise funsome, with a faithful rendition of the original candy-floss theme tune.

Following this trend of

arcade-perfection, the gameplay has also been faithfully retained. The whole thing is a veritable bubble fest, with loads of jumping, clobbering and general bubble excitement for the taking, and even the fact that it has infinite continues doesn't stop it from being a fun-filled feast.

RAD

Playing Marbles used to just involve hitting some other marbles out of a chalk circle in the playground. However, those enterprising folks at Atari took the marbles and made them battle it out in an all or nothing race set across varied isometric 3D scrolling landscapes.

The object of each race is simply to reach the GOAL! flag positioned at the end of the course. But before you can get there, it's your job to negotiate a number of cunning traps positioned by the Marble Madness authorities. Each level has its own hazards to overcome and there are also the likes of mutant black marbles and moving acid pools trying to stop your attempts.

Controlling the marble is perhaps the stiffest challenge. The orb-like object responds realistically to the landscape and owing to the inclined surfaces, tends to roll about a bit. Later levels also boast massive ramps that your marble uses to perform nifty jumps.

Sounds like a bit of a challenge, huh? Let's put it this way - Marble Madness is the ultimate test of your ball controlling abilities!

▲ Acid pools dissolve the marble.

LEVEL PREVIEW

The worlds of Marble Madness are very strange indeed, guaranteed to test every aspect of your sphere-controlling abilities. Here's a preview of each level of the game.

LEVEL ONE

The difficulty level is set to vegetable level for the beginner race - even most of the holes are surrounded by safety rails, doh!

LEVEL TWO

Things get marginally more difficult here. Watch out for the deadly iced whirlpool just before the goal line - it spins you out of control!

LEVEL FOUR

Hazards abound on this level. Vacuum cleaners, enemy marbles, massive leaps and crushing mallets are just the beginning of your troubles.

LEVEL SIX

The ULTIMATE race - set in the void of space! Platforms are pretty scarce on this level, and to make things worse, you have no idea where any chute leads!

MARBLE MADNESS

LEVEL THREE LEVEL FIVE

More holes and slimmer paths make level three a lot more interesting. A potentially deadly wave machine lurks at the end of this stage - aaagggghhh!

On this level, everything you know is wrong! The enemy sprites can be destroyed on contact for extra time, and even the gravitational pull is reversed!

▼ Go-er! Here, the orb-like hero is accosted by strange suction creatures. They're deadly.

COMMENT

I've been waiting for a truly arcade perfect version of Marble Madness for almost 15 years, and it's finally arrived. Not only is the gameplay absolutely

JULIAN

identical, but this version also features note-for-note sound and spot-on graphics. Some players might be disappointed by the fact that there are only six levels, but personally it doesn't bother me at all - there are three difficulty settings and I found myself going back to it constantly to see whether I could improve my score, even after I had finished the game many times! If you want to experience a truly classic arcade game, take Marble Madness for a roll.

NINTENDO'S GOT BALLS

Nintendo owners that like the look of this game should check out MB Games' version of Marble Madness. It's got all of the features of the Megadrive version including the two-player mode, all of the levels and all the hazards too! It's so good, in fact, that we gave it a groovy 85% when we reviewed it back in MEAN MACHINES issue 12!

CONTROLLING YOUR BALLS

- Two control methods are included in Marble Madness. The NORMAL mode moves your marble as per your joystick movements. However, since most of your movements are difficult diagonals, the GRID method can be employed. Here if you say, move right, your marbles moves right in the diagonal perspective (so it appears to be going up and right). With both control methods, pushing one of the buttons boosts the speed of your marble.

MEGADRIIVE

REVIEW

A BRACE OF BALLS

Just like the original Atari arcade machine, Marble Madness has the simultaneous two-player option available. This doesn't change the gameplay much, but there are plenty of laughs to be had as the two of you race to the finishing line. Not surprisingly, extra bonus points are given to the winner of each race.

▲ There's just enough time left to reach the GOAL line!

COMMENT

RICH

Marble Madness is yet another excellent game from Electronic Arts. The first things to strike you are the excellent graphics. The subtle hues of the coin-op's backdrops and sprites have been captured perfectly, and the animation on each sprite is truly excellent. In this respect, Marble Madness is arcade perfect. The same can be said of the superlative sound - each of the weird and wacky soundtracks complements the frenzied action perfectly. In the playability stakes, Marble Madness comes out tops too, with the inertia on your marble making for smooth, responsive control. The only slight downer is the fact that there are only six levels, but even if you complete these, the difficulty level is jacked up, providing even more hazards and challenge. Add in the two-player mode and you've got a cartridge that you should add to your collection - NOW!

▲ A bewildered marble, like this one, is more difficult to control.

▲ The mallets spring up from nowhere to give you a good bang.

▲ Oh dear! Some spaz has sent the marble flying off the edge - doh!

SMASH TV.

Welcome to Smash TV, the ultimate game show staged sometime in the early 21st Century. In this sport of sadism, the stakes are high and the prizes are incredible. There's no dumb blonde twirling a wheel here to decide your fortune - Smash TV is all down to your skill and blasting reflexes. There's only one snag - muck it all up and you forfeit your very life (cue slow, mocking, diabolical laughter).

The game itself puts the player into a series of open room studio sets, where the object is simply to blast every single enemy sprite that arrives on-screen. During this carnage, the contestant boosts his destructive potential by collecting the power-ups and extra weapons that regularly appear within the studio. Once the arena is clear, the exits open up, allowing the contestant to enter a new chamber full of dangerous foes.

And what foes they are! Each major arena in Smash TV is packed with hundreds of enemy sprites and each also boasts a huge, lethal boss - your first target being the gargantuan Mutoid Man. Suffice it to say, he's taking no prisoners!

SMASH ORIGINS

Smash TV is a conversion of the massively successful Williams coin-op, in itself a remake of an earlier Williams classic, Robotron 2084. The coin-op is unusual in the fact that two joysticks are used to control one contestant. One stick controls the player's movements, while the other controls the direction of his fire. For example, by using this arrangement, it's possible to run left while shooting right at the same time. Should you have two NES controllers at the ready, the Nintendo version even mimics this feature.

SMASHING PRIZES

Every so often, your contestant enters a bonus arena in the Smash TV studios. Just scoop up those vast mounds of prizes as fast as you can before they vanish before your very eyes! The actual prizes you 'receive' are revealed on a monitor. Experienced Smash TV contestants usually reel in hundreds of pop-up toasters, VCRs, luxury holidays and homes during one game. What do prizes make? Points! At the end of the level, these prizes are transferred into bonus points and added on to your doubtless colossal score.

SMASH IN THOSE SPRITES

Tons of enemy sprites infest the screen at one time, and all of their short lives are dedicated to disposing of you in some vaguely entertaining manner. Swarms of baseball bat-wielding grunts are your first problem, but in the same set of rooms expect to meet the likes of Mr Shrapnel and Mutoid Man - agggghhh!

COMMENT

RICH

Smash TV is a real laugh in the arcades and this Nintendo conversion is simply fantastic. Of course, the graphics and sound aren't half as stunning as the original Williams coin-op, but what it has got is the sheer excitement factor that the arcade machine delivered. The enclosed screen is very claustrophobic, making the urge to blast the sheer amount of enemy sprites on-screen even stronger. Making the action even more exciting are the superb weapons, blowing up legions of marauding sprites with a scatter grenade launcher has never been so much fun! With all of the different options and the two-player mode, Smash TV is simply a superlative purchase for any NES owner that enjoys shooting everywhere.

SMASH HITS

There's some rather heavy destructive hardware available in Smash TV. Your bog standard rifle can be upgraded for gear like rocket launchers, grenades and three-way fire. Other icons have effects other than offensive. Speed-ups and defensive satellites are also available for your contestant to collect.

COMMENT

JULIAN They're all rather small, which makes the game look rather unimpressive. But it's not the visuals that are important here - it's the gameplay, and Smash TV delivers in a BIG way! It's challenging, addictive and completely blows away all the other Nintendo shoot 'em ups I've ever played!

This is what I call a REAL shoot 'em up! Pure, unadulterated, relentless, frantic action which tests your reflexes and skills to their utmost. Total concentration is required - if you take your mind off the action for a second you're instantly overrun by the hundreds of enemy droids that are all out for your blood! Because there are so many sprites on screen at once, the game looks rather unimpressive. But it's not the visuals that are important here - it's the gameplay, and Smash TV delivers in a BIG way! It's challenging, addictive and completely blows away all the other Nintendo shoot 'em ups I've ever played!

Based on the very obscure but dead entertaining 1970's spy show, *Mission: Impossible* puts you in a rather tricky situation. Dr O, boss of your top secret government spy branch, has been kidnapped by the Sinister 7. Only you and your spy cronies can save the day and put a stop to the evil activities of the Seven once and for all.

Unfortunately for you, the name of the Sinister 7 is a mite misleading, as you soon find out. Walking out onto the streets, you are accosted by not seven baddies, but more like seven hundred. And they're all armed with knives, guns and petrol bombs. Clearly this isn't going to be as easy as wandering around an underground hideout wearing a wig like the heroes did in the TV show.

Mission: Impossible is an eight-way scrolling overhead-view combat game in which the player finds his way around the sprawling map, meets contacts, solves puzzles and kills bad guys. The object of the game, should you choose to purchase it, is to rescue Dr O and destroy the Sinister 7 base of operations, thereby removing a serious threat to world peace.

ACTIVE REAGENTS

▲ Plenty of explosive action here.

Three agents are commanded in *Mission: Impossible*, giving the player the equivalent of three lives. Not only this, but each of the three agents has his own special abilities, activated by swift presses of the A button for an attack, or B button for a special item. The team leader Jim has a machine gun and land mines - great for large-scale destruction. His first team-mate attacks with deadly fists and stun grenades while the other hurls deadly boomerangs and has the power to make himself invulnerable to any attack for a few seconds. It might sound like the Sinister 7 have no chance against such well-endowed enemies, but beware - special items have only a limited number of charges before rendering themselves useless!

▲ A deserted corridor makes for a thrilling picture.

▲ Words of wisdom from a secret contact.

MISSION:

COMMENT

JULIAN

Mission: Impossible reminded me of *Metal Gear*, but while *Metal Gear* was a bit naff, this is top notch, even though it doesn't look like it from the rather drab graphics. What you can't see is that there's tons going on. Once you start playing, you really get engrossed in the action as you try to solve the many puzzles scattered throughout the game. If you're after an original and challenging game with loads of variety and plenty of different things to see and do, check this out immediately.

IMPOSSIBLE

NINTENDO

REVIEW

牛奇集

▼ A deserted corridor makes for a thrilling picture.

TV-STYLE PRESENTATION

Fans of the Mission: Impossible TV programme will be overjoyed at the sight of the show's original intro sequences which have packed in to the game. These include a Nintendo-ised version of the original theme tune, the 'legendary fuse, the immortal quote "Your mission, should you choose to accept it..." and to top it all, the self-destructing message!

▲ Some more enemy agents buy the farm.

▲ Oo-er! These baddies are too close for

REVIEW

DASTARDLY DOUBLE AGENTS

Dispersed throughout the game are undercover contacts. Their role in life is to provide the player with information vital for success. For instance, one may explain which route to take to avoid danger, or how to progress to the next level. However some of these contacts are in reality dastardly double agents who betray you to the soldiers of the Sinister 7 should you approach them! Oooyah!

COMMENT

RAD

I must be said that Mission: Impossible isn't exactly the most inspiring license in the world, so imagine my surprise when this NES game turned out to be really good fun. The graphics aren't much to speak of, the sprites are simple and the backgrounds are just repeated character blocks with drab colours. The sound is okay though, with a faithful rendition of the TV score and some decent effects. What really stands out about Mission: Impossible is the involvement it produces. The map is quite large, with a great deal happening all the time. There are lots of secret rooms to discover, contacts to find and puzzles to solve. Mission: Impossible is a thoroughly playable and addictive game which is well worth a look.

▲ You'd be smart to watch out for bad advice.

▲ A close-range gun battle is on the cards here.

WRITE ON

▲ Get that Medi-Kit!

In order to rescue the Doc, the player first completes a number of sub-missions. On level one, six switches must be found and turned off to disable a defence mechanism. As each one is tripped a clue is given hinting at the location of another important place or action. Write these down as you'll need them later on.

THE WORLD'S FIRST COMPUTER GAMES MAGAZINE — ON VIDEO!

R-TYPE

Jeepers! The Bydo Empire has massed a huge alien task force on the edge of the galaxy, and it's heading straight for Earth! An all-out attack with space cruisers would be impossible, owing to the fact that the Bydo scum could pick them up on their scanners and listen to their mobile phone calls (and then presumably blast them out of the cosmos). No, only the tiny R-9 fighter, with its anti-scanning alloy shell can blast off into the inky vastness that is space and take on the Bydo Empire in an all or nothing space battle.

If you hadn't figured it out yet by looking at the screenshots, R-Type is a horizontally scrolling shooter 'em up with the usual plethora of power-up weapons, waves of enemy sprites and end-of-level super bosses. There are five levels of blasting action, early more dangerous than the last, choc-a-bloc with Bydo aliens.

Can you defeat the whole damn lot of them and then survive an epic confrontation with the Bydo leader, the absurdly named El Supremo?

COMMENT

This is something of a technical achievement for the Gameboy, but it's quite slow and in the excitement stakes it isn't as good as the skillful Parodius. If you've got that, I'd wait to see if Gradius II is any good before getting hold of R-Type.

RICH

▲ Everything you wanted to know about the R-9, but were too uninterested to ask.

▲ Meet the second end-of-level boss.

USE THE FORCE

Collect a power-up, and an indestructible pod (known strangely as The Force) attaches itself to your ship. Three different weapon variations are found in the game.

REFLECTIVE: This laser bounces around the scenery, destroying everything it touches.

FIRE CHAIN: Hugs the ground, destroying everything it touches.

BUBBLE UNIT: Covers a great area in front of the ship.

COMMENT

Gameboy R-Type is amazingly similar to the original arcade machine. The only problem is that it's a bit slow. In the blasting stakes, Parodius and Gradius II are

JULIAN better, but if you can't wait until they're released, this is worth checking out.

▲ This Bydo meanie's about to die.

REVIEW

KLAX

It's the arcade puzzle game second only to Tetris in the best-puzzle-game-ever stakes. It's the game that had thousands of cool, Pepsi-drinking Californians super-glued to coin-op cabinets. It's Klax, the tic-tac-toe-like game requiring skill, genius and cunning amongst other things.

The aim of Klax is simply to klax. You klax by creating klaxes. As you'll see from the screenshots the game is set on a 3D ramp. Different coloured tiles roll along the ramp, and it's your job to collect these tiles and arrange them in the bin below the ramp. A klax is a just three (or more) tiles of the same colour placed in a straight line. This straight line can be either horizontal, vertical or diagonal. Once a klax has been created, the tiles vanish, enabling you to fill up the bin with even more tiles in pursuit of more klaxes.

The game itself is divided up into 99 waves, and each wave has a different objective. For example, on wave one, you just have to complete three klaxes before moving onto wave two. Later on things get more difficult. For example, you may have to survive a tide of 100 tiles, or clock up 10,000 points to progress. Once you've completed wave 99, the game is won.

You aren't permitted to let any of the tiles fall off the ramp without you collecting them with your paddle. You're only allowed to let three go over before the game ends. Reach a warp wave, though, and your life-count is cleared.

However, real Klax-perts couldn't care less about completing wave 99. Apparently the real test in Klax is in amassing as high a score as possible...

COMMENT

I like a good puzzle game, and the original version of Klax is one of the best. This Master System translation is almost arcade perfect. The graphics are excellent, with

RICH

the backdrops of the coin-op perfectly reproduced. Although the speech is missing, the sound is still all right, and the extra bonus tune isn't that bad at all. But it's the playability that's all important and Master System Klax scores very highly. The controls are super-responsive and every arcade Klax tactic can be used in this version too! Guaranteed to last longer than most traditional arcade games, Klax is the best puzzle game available on the Master System, and well worth investing your 2,999 pennies in.

Constructing a cunning klax.

There's 10,000 points for this five-klax!

O-o-er! Something's gone very wrong.

MULTIPLE KLAXES

The score multiplier is the high scorer's best friend in Klax. When tiles disappear after completing a klax, the tiles on top fall down. If these should fall to form a klax, you get double the score. If the tiles above this klax fall into another you get triple the score for the klax. Sounds interesting? Well, put it this way, there's one klax which creates so many multiples you end up with a score of over 265,000! That's a whole lot of points.

SEGA

REVIEW

KLAX

BY: DOMARK

PRICE: £29.99

RELEASE DATE: OUT NOW
GAME DIFFICULTY: MEDIUM

LIVES: 3

CONTINUES: 3

SKILL LEVELS: 3

RESPONSIVENESS: GOOD

1-2

PLAYERS

PRESENTATION 80%

Absolutely loads of options to fiddle with.

GRAPHICS 84%

The backdrops are almost arcade-quality, but the tile sprites are a little disappointing.

SOUND 85%

Surprisingly good music plays throughout, and there's a variety of decent spot effects.

PLAYABILITY 91%

Superb controls and instantly addictive gameplay means that you shouldn't start playing this if you've got other to do.

LASTABILITY 86%

Loads of levels and the type of game which never seems to get stale makes this one of the longest-lasting puzzle games around.

OVERALL 88%

Brilliant controls and highly addictive gameplay make this the best version of Klax available. A must for arcade puzzle fans.

COMMENT

JULIAN

Klax has to be one of the most converted games of all time! As well as the original coin-op, I've played the Spectrum, Amstrad, C64, GX4000, SAM Coupe, PC, ST, Amiga, Lynx, PC Engine, Megadrive, Nintendo and Gameboy versions! But of them all, I think this Master System version is the best yet! The control method is crisp and precise and the tiles fall forward at just the right speed to maintain a truly manic challenge, yet not make the game so hard you give up with frustration. Klax is definitely the best arcade puzzle game available on the Master System - players with cat-like reflexes and lightning quick logic shouldn't miss it.

▲ Two klaxes merge here for a point-scoring bonanza!

WARP WAVES AHOY!

If completing the game is your prime objective, using the Warp Waves is your best bet. There's no secret as to which waves are warp waves because it tells you just before the action begins. However, to successfully warp, you must construct a BIG X (as pictured). The BIG X gives you lots of big points too. Good eh?

TM

▼ A fine diagonal four-klax there!

IF YOU DARE!

Bloop the dinosaur is an unfortunate little chap. It just so happens that his deadliest enemies the Trogs have taken over the islands of Og on which Bloop resides. Not only this, but Bloop and his pal Spike have a passion for eating Trog eggs which the Trogs obligingly leave lying around outside. This leads to all sorts of hanky-panky as the Dino-mites (!) Bloop and Spike venture into Trog territory to eat the eggs and the Trogs chase after them with the express intention of gnawing on their lightly cooked flesh. Grab all the eggs on an island and you escape to the next one. Fail and you're treated to a little scene of a Trog slicing up and eating Bloop and Spike!

Trog is very much like a battle version of PacMan: your small Dino-mite legs it around the islands dodging and biffing the aggressive cave-men and munching their eggs. The going gets a little tougher later on as routes are blocked off with dinosaur bones, meaning teleporters and catapults must be used to reach some parts of the island!

DIZZY DINOSAURS

Spike and Bloop might look like a harmless pair of mini Triceratops babies, but they are in fact the transforming dinosaurs of doom. Munching on a red flower endows our prehistoric heroes with extra speed, allowing them to zoom around the islands faster than Maggie Thatcher in a Westland helicopter, whilst blue mushrooms slow them to a crawl reminiscent of Nicholas Ridley's thought speed. Eating hot tamales inflames our dino friends with such spiciness that they are instantly capable of spitting fire at Trogs. Best of all, though, is the pineapple. One of these transforms the eater, for a limited period only, into a terrifying Trog-eating Tyrannosaurus Rex!

TROG

CAVEY DAVEY

Later islands are comprised of several sections, each one fenced off from the other, or even divided by a gaping chasm. There are two ways to cross these. Fences are easily crossed using transporter caves. These caves have a symbol on them, and your dino is transported to the cave with a matching symbol. This is especially important to remember when you're on an island with up

NINTENDO

REVIEW

COMMENT

If you're an NES owner who's been steaming with envy over the Megadrive and Master System PacMan games, steam no longer. Trog is really just a PacMan variant with a few new bits bolted on to protect it against the lack of variety which was the downfall of the original PacMan. Graphically Trog is nothing much to speak of, and the sound is also inoffensive. The gameplay is quite fun, with plenty of eating and teleporting action, although you do tend to fall off the edge of the island with no warning when things get hectic. In the end, though, despite all the additions, Trog still lacks enough action and variety to make it really special. Undoubtedly, it's a great conversion of the coin-op, but only Pac-fans need apply.

▲ The Pac-style balls in Trog, as you can see.

▲ Close-by models get the first treatment.

to eight caves! Chasms can only be breached using a catapult. These handy devices lob the spiky ones over the gap - but be careful there's not a Trog patrolling your landing patch!

PERILOUS PITFALLS

The Troggs aren't the only ones out to get you - there are also the distant cousins of the Troggs who have springy feet to trample all over you, tar pits which appear from nowhere to swallow your personage and spinning wheels launched from underground which spang into you and cause your demise. It's also a good idea to steer clear of fires and bottomless pits, as falling into either of these is known to be bad for the constitution, as is falling off the edge of the island.

REVIEW

▲ Three warp tunnels lead to other parts of the maze.

▲ Collect those eggs, Bloop - NOW!

BONUS FEST

Completing a certain number of levels provides access to any one of three Trog bonus screens. Here, points are scored and Trogs annihilated. The three screens are Trog Feast, in which you are instantly transformed into a Tyrannosaurus and eat as many Trogs as possible within the time limit, Trog BBQ in which you roast loads of Trogs, once again within a time limit, and Diamond Stealing where you have a certain length of time in which to clear the screen of all the Trogs' diamonds, thus earning many points.

▲ There's plenty of bonus goodies available

COMMENT

I really enjoyed this at first, but the problem is that even though there are three different bonus screens and the playfield layout changes from level to level, the egg-collecting action ultimately

becomes dull. I like the humorous touches in the game - roasting 'n' chompin' the Trogs is a hoot - but at the end of the day there's no disguising that Trog is PacMan with extra bits. The challenge level is never very high, and any player with reasonable skills should be able to get huge scores within a few days. Trog is one of those games that the whole family will love and enjoy. If you're a solo player out for some fast and challenging action, though, look elsewhere.

BY: ACCLAIM

PRICE: £TBA

RELEASE DATE: TBA

GAME DIFFICULTY: EASY/MEDIUM

LIVES: 3

CONTINUES: 3

SKILL LEVELS: 3

RESPONSIVENESS: AVERAGE

PRESENTATION 70%

Not many options, but some "hilarious" intermissions.

GRAPHICS 78%

Small sprites, but enough colour to make it jolly.

SOUND 73%

None-too-horrific tunes and the effects aren't all that bad either.

PLAYABILITY 80%

Fast-moving and lots of fun to play.

LASTABILITY 71%

A veritable levels-fest, but the challenge is low and after a while it all becomes rather repetitive.

OVERALL 74%

A jolly game which provides plenty of short-term fun, but hasn't the variety to sustain interest.

ONLY £2.95

CONSOLE GUIDE IN
THE SERIES!!**

STORY

The year is 2016, and the Earth is ravaged by global war. However, peace conventions in the 1990s banned the use of nuclear weapons and all the fighting is carried out by super-powerful vehicles. One man is a mite peeved at all the devastation going on around him, so it's fortunate he is the owner of the legendary Granada X tank, the most powerful ever, and as a result is in a good position to do something about it. His plan of action is to randomly attack military enemy sites and forces until everyone sees the error of their ways and stops shooting each other.

Granada X is another Megadrive shoot 'em up, but this time it's got a few original ideas such as top-view multidirectional playfields and a novel control system. As usual though, there are lots of nasties to shoot, lots of extra weapons to shoot them with and, of course, those end-of-level guardians to contend with.

▲ The final boss! Take out each of its limbs and blast its many weapons to complete the game.

▲ Granada's under a serious laser bombardment here. Watch out!

STAGE ONE

The first port of call is a peaceful section of the Tobora district. Watch out for the horrific flying fortress, Gible, at the end of the level.

MANEUVER

GRANADA

CEPTOR

— TARGETS OF DOOM —

Unlike most Megadrive shoot 'em ups, Granada X scrolls in eight directions. Each level is set in a maze-like location in which several specific targets are located. Granada must hunt these down and destroy them to complete the level. Their approximate location is shown on a small radar screen, but finding them is still tricky since many of them move around.

- ▲ Granada closes in on one of its mission objectives. These take multiple hits and there are eleven more to blast into oblivion after this one. Terrifying, isn't it?

RAD

Blimey! It's a shoot 'em up on the Megadrive! I haven't seen a hundred million of these before, honest. It must be said that the genre is wearing thinner than Paul Daniels' hair, but Granada X fortunately has more redeeming features than said magician. The maze-like structure and seek-and-destroy missions put it a cut above the standard linear scroll blasters, and the sheer variety between levels mean that there's plenty here to keep you coming back. If you're buying a new shoot 'em up and want something different, go for this.

STAGE TWO

The battle moves to the flying battleship, Astarsha. It can only be destroyed by blowing up each of the massive engines on the wings.

COMMENT

Don't judge this book by its cover! On the surface, Granada X is a sad sham of small, feeble-looking sprites and rather naff backgrounds. Get into it,

JULIAN

though, and you find a really original and challenging blaster which tests the mettle of even the toughest of shoot 'em up addicts. The game gets better the further you go and on later levels there's a frenzied assault on your tank - if your reflexes aren't up to scratch, it's goodnight Vienna! Granada X doesn't rank as an absolute must, but if you're a fan of difficult-to-complete, fast-action games, check this out.

WEAPONRY OF DESOLATION

Being a miracle of modern warfare, you'd expect Granada X to have some decent weapons to play with, and you'd be perfectly correct. Your tank starts out with two cannons - a standard rapid fire laser which is best used against large numbers of small opponents and a monster destruction plasma cannon, sixteen times more powerful than the regular laser! However, it's only single-shot, and the considerable recoil experienced when launching this death-dealin' projectile could push you over the edge of a skyway if you're not careful! Granada also has some topper support units, such as a flying disc which sprays laser fire all around, homing missiles and even spinning shield bombs.

MEAN MACHINES

STAGE THREE

Noted for its high-altitude highways, the Shuba district is deadly. The boss here is the lethal Valsac. Blast or be blasted!

STAGE FOUR

Night falls as Granada reaches the Kilomoto district, and eerie search lights illuminate the area. Can you survive long enough to face the deadly guardian?

BY: WOLFTEAM

PRICE: £34.99

RELEASE DATE: TBA

GAME DIFFICULTY: MEDIUM

LIVES: 1-5

CONTINUES: 3

SKILL LEVELS: 3

RESPONSIVENESS: MEGA

PRESENTATION 80%

A fair few options and interesting controls.

GRAPHICS 71%

Tilthy sprites and reasonable backgrounds.

SOUND 70%

The BGM isn't too hideous, and the effects are pretty good.

PLAYABILITY 85%

Much more depth than your average shoot 'em up, and great fun to boot.

LASTABILITY 80%

Quite a few not-too-easy levels and only three continues mean that there's plenty here to keep you challenged.

OVERALL 82%

An addictive and original blaster which is well worth checking out.

REVIEW

If you like watching the Simpsons or WWF Wrestling, 2014 is not the year for you. Many of Earth's communication satellites have mysteriously started to disappear. The global flow of information (and home shopping channels) has been disrupted and much of western civilisation has been thrown into chaos.

All is not lost yet, however, as one Government organisation still has its secret satellites operational and therefore has enough information to solve the mystery. That organisation is the Special Assignments Division, and they've dispatched their top agents Albatrios (hero of the original Rolling Thunder) and Leila to find out what's going on. The news is bad however. Alby's old nemesis, the terrorist organisation GELDRA, has risen anew and is destroying satellites like there's no tomorrow so they can take over the world and make sure there IS no tomorrow!

Albatross and Leila have just two game days to get through the eleven platform levels that make up the entire GELDRA organisation and destroy the nerve centre. Failure will result in the planet being doomed...

ROLLING THUNDER 2

BANG! CLICK! OO-ER!

The plot of Rolling Thunder 2 might sound like a movie, but there's no element of the game which is firmly based on real life. Each agent has only a limited supply of bullets with which to shoot people. More bullets can be found behind doors, but should you run out, you must resort to your laser. This fires slow-moving, feeble jolts of energy which aren't much use against more than a couple of GELDRA at once.

JIM MORRISON'S PALS

In Rolling Thunder 2, men are men and doors are doors. Proper doors that you can open, leaving you free to search the room concealed behind them. A few of these rooms are host to some topper goodies, such as extra bullets, extra time, bonus points and special weapons, but the vast majority are empty. To make life easier for you, those helpful GELDRA chappies have signposted the most useful rooms.

▲ The gate opens here, spewing out legions of hideous, deformed GELDRA. Blast 'em all!

DOUBLE AGENT ANTICS

THUNDER 2

PEOPLE ARE STRANGE

Doors have more than one purpose. If you're about to get massacred by an army of GELDRANS, dodge into a doorway and watch their bullets whizz harmlessly past you. Doors aren't the only scenery which allow you to do this, either. There are alcoves in caves, and much of the Egyptian level is taken up dodging in and out of netting under the high walkways.

▲ A dramatic shot here as Leila jumps around a bit.

▲ Ducking into the shadows, Albatross dodges enemy fire. Leila isn't so lucky.

COMMENT

RAD

Well, if it isn't a platform shoot 'em up. There aren't many of those on the Megadrive, I'm sure. Luckily for Rolling Thunder 2, it's one of the best examples of the genre yet seen. The formula may look a bit dated and simplistic nowadays, but it's so much fun to play that it doesn't really matter. The graphics are very good, the animation on the sprites is great and the backgrounds are excellent. The sound is of a high standard too, including a selection of top-notch tunes. Rolling Thunder 2 also packs a real challenge, there are eleven levels and they get very difficult. A password system is used instead of continues, so you never have to play the earlier levels you've completed again (unless you want to). Rolling Thunder 2 is a top quality game packed with action and excitement, although it doesn't quite have that grab factor to make it a Megagame. Highly recommended to those looking for a proper challenge.

FRAP RAY JAPERY

At certain points during the game, a special weapon is made available to you. These are often vital to allow you to progress, such as level two's flamethrower. Without it, it's virtually impossible to defeat the end-of-level guardian. These weapons come with a limited supply of ammo, which cannot be replenished, so you must be careful not to waste it.

SKILL LEVELS: 3

RESPONSIVENESS: VERY FAST

WARNING!

The import version of Rolling Thunder 2 will not work on any UK or American Megadrives, even with a converter or on a converted machine. Furthermore, if you have a Japanese Megadrive configured to work with UK PAL TV sets, it also will not work. Rolling Thunder 2 only works on Japanese SCART Megadrives. So unless you're running a Japanese SCART machine, buy the official version of the game.

COMMENT

If you've played the arcade version of Rolling Thunder 2, you'll be instantly amazed by how close this Megadrive conversion is! The backdrops, sprites, tunes and effects are all nigh on identical to the original coin-op! What's more, the Megadrive version goes one better by actually improving on the coin-op by adding levels - now that's value! The gameplay itself is fast, fun and instantly addictive -

RICH

especially in two-player mode, where you almost have to fight each other to get hold of the extra weapons and ammo! The game is seriously challenging too, as later levels produce hundreds of evil GELDRA agents to blow away. Although the action is slightly repetitive, there's no denying that it's great fun to play. Give it a whirl and you'll see what I mean.

THANKS... to Console Concepts (0782 712750) for the review cartridge.

PRESENTATION 90%

Great intro, end-of-level and intermission screens, plus fab sound test and heaps of options.

GRAPHICS 87%

Large and detailed sprites with funky animation and neat backgrounds.

SOUND 88%

Groovy tunes and violent-sounding effects top off the Bond-esque atmosphere.

PLAYABILITY 90%

Very fast and responsive. There's a lot to do and it's a lot of fun doing it (oo-er).

LASTABILITY 82%

The large number of levels and high difficulty mean this should keep you going for weeks.

OVERALL 85%

A brilliant and exciting game which is well worth the money! Check it out - but don't forget what we've said about official and import versions!

MT 2

If you reckon you're a bit of a hard case, Pitfighting is the thing for you. In this conversion of Alan's popular beat 'em up coin-op, one or two psychopathic headcases battle other horrid loony fighting types in the Pitfighter contest, with big cash prizes awarded to the winner and the losers ending up with broken limbs and worse.

The opponents are a nasty bunch. Most are armed, with horrible pointy things, they're nearly all a lot bigger than you and virtually every one is capable of shrugging off even your most devastating blows with ease.

And if that's not enough to put you off, there's always the King of the Pitfighters. This masked executioner-type taunts you during all your bouts. Should you be man enough to reach this leather-clad loony, he proceeds to beat you into a pulp. Avoid this grisly fate and defeat him and you are proclaimed King, meaning you can quit the circuit and retire to spend all your money.

So choose a player - Buzz (a wrestler), Ty (a kickboxer) and Kato, (a karate champ) - and get fighting.

CLONE VIOLENCE AHOY

After every two bouts, a grudge match is called. In one-player mode, you face a blue-trousered version of yourself. In two-player mode the fun really starts as you beat up your hapless colleague. The first player to knock the other down three times is the victor, so it's headbutts and bodyslams that count, as opposed to feeble punches and sad kicks.

PUTTING THE BOOT IN

In true underworld fighting style, it's the vicious gits who get the spoils. This tradition is carried over to Pitfighter in the form of the Brutality Bonus. Kicking your opponent while he's down, or hitting him as he gets up all adds points to the bonus - so be brutal!

PIT-FIGHT

TER

RIP 'IS LEG OFF

Not only is there violence in the arena itself, but the audience are similarly psychopathic. Should you accidentally run or be pushed into the crowd, they push you straight back in the ring - with their knives. Eeek!

MEGADRIIVE

REVIEW

集
牛
時

ARMS AND THE MAN

Although many of your opponents are armed, don't cry because you can even the odds by utilizing certain items of scenery! Barstools, crates and even shrunken (if you're lucky enough to find one) can be bunged at opponents to cause damage, and pointy sticks and switchblades casually left in the arena by sadists to spice up the action can also be used most effectively.

COMMENT

There's no sprite scaling, the characters are small and the animation isn't great, but this conversion of the Pitfighter coin-op is a laugh to play. The gameplay is

JULIAN horribly violent, and there are plenty of special moves to master. One of the best aspects I found was that each of the opponents has his or her own individual characteristics, so you have to adopt a new strategy on each round. The sheer number of skill levels is also a big plus point, meaning that both novice and expert beat 'em up fans alike can find plenty of challenge! If you're after a bit of mindless violence, give this a go!

REVIEW

THE POWER AND THE PASSION

A handy power-up lurks on some levels. This goodie, in the form of a pill (with a big letter P on the side for ease of reference), is secreted within a barrel or box and is found by smashing the container over your enemy's head. Grabbing the pill not only makes you all but immune to attack, but also grants super-strength. Fab! But make sure your opponent doesn't grab it before you do, otherwise it'll be your monkey ass that gets a kicking.

COMMENT

The sprite scaling and fantastic animation that made Pitfighter such an attention-grabber in the arcades may be gone, but it's still fun to play. The sprites are quite detailed

RAD

and their actions are accompanied by lots of (albeit mediocre) speech and painful-sounding effects, but the movement is unconvincing. What makes it fun is the horribly brutal action - it really is enjoyable to jump on player two's throat as he lies helpless on the floor! The special moves are a smart touch and make each character more of an individual and introduce a bit of strategy into the gameplay. The Megadrive is short on beat 'em ups, and Pitfighter is definitely one you should consider adding to your collection.

YOUR OWN PRIVATE SHOULDER THROW

Each Pitfighter has a variety of special moves which make his fighting style unique.

Can roll out of trouble, shoulder throw opponents, pile drive them and then slam them whilst they lie helpless.

Performs acrobatic cartwheels, jumping spin kicks and special ninja magic hurricane punches.

Ty is the sort of dude who prefers somersaults, a high roundhouse and devastating flying kicks.

VALID 3/1/92
(EXCLUDING CREDIT CARD ORDERS)

That nasty vampire-type Count Dracula himself has risen anew and embarked upon a campaign of death, destruction and double-parking. Having dealt with Drac on three other occasions, the task of putting him to rest one more time has fallen on your shoulders.

All the other vampire hunters in the area have told you to go to his castle in broad daylight, open all the windows and stake him in the heart while he slumbers. But the problem is that even though you went out nice and early to catch the train, because of leaves on the line you arrived at the dead of night. And now you have to take the most difficult route Count-wards, a route at which you can expect to encounter many of his henchmen and zombies before you reach the fully awake (i.e. functioning) Drac himself!

As everyone should know by now, Castlevania is a platform-based whip 'em up full of ghouls 'n' ghouls... er... other such evil-doers. These are disposed of with a whip which is powered up by collecting the various items hidden in candles dotted around the landscape.

The action is spread over a number of long levels, with an awesome minot of Drac at the end of each of these. Can you repeat the success of Van Helsing and pull the fanged one away forever?

WHIP CRACK-AWAY

The hero's primary form of armament is a whip. This starts life as a relatively feeble leather affair that has little effect on most baddies. Whip a couple of candles, however, and the first power-up makes itself known. This little beauty transforms the flailing weapon into one made of steel chain! The next step up from this is an extended length attachment, allowing you to flayellate from greater distances!

TRICKS WITH LEATHER

If your mind works, it pays to be handy with your special secret. This means you've learnt a pretty fancy move with your long floppy weapon. Keeping the attack button pressed down, your weapon can be flailed in any direction by the use of some handy wrist action. This allows you to tick enemy legs or repeatedly whig them to death with little effort.

SECRET PLATFORMS

The stairway towards the final confrontation with the Vlad harbours a deadly secret - deadly to Dracula that is! By jumping through the centre of the first flight of stairs, a secret invisible platform is discovered! Walk to the far left of these, and goodies aplenty are dropped on you from a great height, restoring all your energy, granting ninety-nine special weapon hearts, and a treble boomerang cross package with which to seal Dracula's fate.

BONUS AXE-TION

There's more than one way to skin a cat, and similarly, there's more than one way to slaughter a horde of Dracula's meanies. Whipping them is the easiest, but concealed behind candelabras are three different special weapons: throwing knives, axes and boomerang crosses! One of these can be used for every heart collected, although only one item can be thrown at a time unless a double or triple icon is collected, leading to multi-weapon on screen potential!

RAD

For the first few levels, Castlevania crips its way along like a sad excuse for a game and the whole thing seems a huge disappointment. Get through them, though and this view changes quickly! Some of Castlevania's backgrounds and enemy sprites are fabulous, with lots of scenery rotation and other tricks the Famicom is now famous for, but what really saves Castlevania is the difficulty packed into the later levels. Suddenly things get a lot harder, but not frustratingly so, and it all becomes very addictive. Castlevania IV would never make it as an arcade game. It just doesn't have that instant grab factor, but if you're willing to persevere Castlevania is a must.

COMMENT

COMMENT

JULIAN

When I first sat down and played this, I thought it was a bit dull. On the first few screens there's nothing much threatening you, and it's just a case of trolling around the platform landscape disposing of the odd slow-moving baddie who pops up. However, once you get past the first guardian things start to warm up with hordes of aggressors and some devilishly tricky screen layouts to test your platform skills to their limits. The graphics are superb, with heaps of neat touches, and the music is astounding - heaps of truly stunning creepy tunes which work perfectly with the visuals to create an incredibly spooky atmosphere. It's a big game with loads of levels, and it takes a lot of skill to get all the way through it, even with the continues and password system! If you're after one of the finest platform games around, look no further than Castlevania IV!

CUDDLY CANDELABRA

Dracula's penchant for artificial lighting may be his undoing. The score of candelabras he has left hanging around the path to his lair hold many secrets in the form of goodies. These scrummy gifts, such as whip power-ups, special weapons, hearts (used to power special weapons) and even energy-restoring food, are obtained with a simple flick of the whip.

Thanks to Shekhana Consoles for loaning us the Castlevania IV cartridge. If you require more information about the game, give them a bell on 081-340 8565.

BY: KONAMI
PRICE: £45.00
RELEASE DATE: NOW
GAME DIFFICULTY: MEDIUM
LIVES: 1
CONTINUES: INFINITE
SKILL LEVELS: 1
RESPONSIVENESS: VERY FAST

PRESENTATION 89%

Brilliant options and set up screens.

GRAPHICS 90%

Some wondrous sprites, animation and backdrops make Castlevania a visual treat.

SOUND 95%

Stunning, atmospheric tunes and some very interesting effects.

PLAYABILITY 95%

Slow to start with, but once you get into the swing of things, it's great!

LASTABILITY 92%

Lots of levels await your whip-swinging presence, and they're pretty difficult to master!

OVERALL 93%

Get past the disappointing early levels and you find a superb platform game which mustn't be missed.

Got something to sell? Or want to swap games? Do you want something, or do you have a special message? Perhaps you just want a pen pal? Well, whatever you want, the MEAN MACHINES Megamart is the place for you.

For just £1.00 you can have your very own advertisement containing up to 20 words! Or if you're feeling rich and verbose (look it up in the dictionary), £2.00 will buy you 40 (count 'em) words!!

So what are you waiting for? Fill in the squares below with your words, pop it in an envelope along with a cheque or postal order made payable to MEAN MACHINES and send it to:
MEAN MACHINES MEGAMART,

MEAN MACHINES, PRIORY COURT,
30-32 FARRINGTON LANE, LONDON,
EC1R 3AU.

ATTENTION!

MEAN MACHINES Megamart is for private advertisers only. Anybody sending in a trade advert will not have it published. It will be ignored, your cheque will not be cashed and no correspondence will be entered into! — However if you are interested in placing a lineage trade ad please contact Martha on 071-251 6222 NOW!

Due to deadlines, allow up to six weeks for your advert to appear in the magazine.

**I WANT TO USE THE MEAN MACHINES MEGAMART.
HERE'S MY MESSAGE...**

NEW GAME

P REVIEW

HOT CONSOLE GAMES COMING SOON...HOT CONSOLE GAMES COMING SOON...

Out on the fabulous Super NES early next year is Capcom's own conversion of their breathtaking coin-op platform beat 'em up, *Magic Sword*. At the top of the Dragon's Tower, so the story runs, the malevolent Black Orb slowly sucks light and goodness from the world. If it is, of course, your job to battle up the fifty (albeit short) floors of the tower and destroy said orb. On the way you rescue captured warriors such as ninja and lizardmen who join you in your quest and make the going a lot easier. The Super NES version will lose the arcade machine's dual-player mode, but promises to provide plenty of fantasy-style platform combat.

▲ Spot the difference! As you can see, the Super NES version of *Magic Sword* is very close to the coin-op. Check out the arcade shots.

SUPER FAMICOM

PHALANKX THE ENFORCE FIGHTER A-14X ファランクス

Just when you thought UN Squadron was the last word in shoot 'em up thrills on the Super NES, Phalanx has made itself known. It's a sprawling shoot 'em up that boasts devastating graphics, lots of huge enemies to destroy and a maze-like level set inside a fortified asteroid! It's looking rather exciting, so you can be sure that we'll be reviewing it as soon as it's out.

SUPER FAMICOM

Even non-computer owners will have heard of Lemmings. It's the classic puzzle game which casts you as a Lemming God, controlling the fate of all your Lemming subjects. Fortunately for them you are benevolent and have seen fit to save them from the many accidental deaths for which lemmings are famous. To help you save these stupid, dumb creatures you can grant individual Lemmings special powers, such as being able to bridge gaps over gaping chasms and dig through rocks. Lemmings is available next month on the Super NES, and there are NES and Gameboy versions also in the pipeline.

SUPER FAMICOM

SHINING FORCE

Shining Force is the sequel to the nice-looking, but rather dull-playing Shining in the Darkness. The graphical feel of the original has been retained, but the gameplay has been much improved. There are new monsters, a huge choice of player-characters, a much-improved 3D perspective combat system and the exploration part of the game has been transformed into a more Vermilion-style overhead view. Overall, the game looks great, boasting the fab graphics and depth of gameplay of the original, but losing the duller elements that spoilt Shining in the Darkness. Sounds like one to watch out for - you'll see it first in MEAN MACHINES.

MEGADRIVE

★ ★ ★ DESERT STRIKE ★ ★ ★

Cor! It would appear that some Middle Eastern megalomaniac is attempting to start World War III! This is the not-at-all-based-on-real-events plot behind Electronic Arts' new shoot 'em up Desert Strike. The action is seen from a remote forced perspective 3D viewpoint, and the player has five missions to undertake, each with up to ten separate objectives! These include blowing up airfields, destroying command centres, demolishing radar sites and seeking out friendly spies planted in enemy installations. Later levels include such chopper-related delights as a level spent dodging through a cityscape of skyscrapers! So far the cart is looking well up to the usual high EA standards, and you can be sure that we'll be the first with the full lowdown.

▲ Blowing up an airbase!

▲ Each mission starts at your home base - a massive warship! Only return when you've finished every sub-mission.

▲ This map is used to locate each mission objective which flashes helpfully.

▲ Ow! This is what happens once enemy fire has blown away your protective armour!

MEGADRIVE

▲ Only by using his magic green book can our hero move those large heads and progress.

▲ By collecting three crystals and arriving at this spot, the hero can pull out that massive sword that's stuck in the stone. This magical chopper fires magic bolts.

LEGEND OF ZELDA III

The long awaited Super NES Zelda III was recently unveiled in Japan. It's very much like the first two NES Zelda games, with the action being viewed from overhead. The emphasis is definitely on role-playing, with an immense map to explore, a wealth of puzzles to solve and heaps of monsters to clobber. Zelda III certainly looks to be a hot title - wait until next month and we'll give you the definitive review.

The city of Old Detroit is in the grip of a powerfully addictive new narcotic called nuke. What with you being the hardest cyborg on the police force and everything, you're the one dispatched to clear up this little trouble spot by arresting all the nuke dealers and confiscating all the nuke. As well as this, you also have to deal with the renegade Robocop 2, a massive, powerful cyborg which has gone a bit loopy and decided to take over things a bit. The action is platform-based, but there's also an Operation Wolf-style shooting range where Robo has the chance to recalibrate his sights. If Robo is tops in your book of heroes, check out the review next month.

■ In Robocop II, the objective is pretty simple. Just blast those felons and collect that Nuke in order to reach the next level. Simple... we don't think!

PLAYERS

Hi! YOB here with some more inside gossip! After the mammoth Christmas issue last month, the MEAN MACHINES crew (and MEGATECH editor Paul Glancey) decided they needed a holiday and all whizzed off to a massive rented farm house in Abergwesyn, a very remote part of mid Wales. What did they get up to? Well, I managed to get hold of the pictures they took - which they didn't want you to see!

YOB'S GOSSIP!

▲ I can only think that Rich 'n' Jaz are trying to see whether Radion washes whiter than white!

▲ Who the hell do these guys think they are?

▲ Rad after being washed.

▲ If anyone thinks they know what's going on in this picture, please write in to me - a prize for the best suggestion.

▲ I can hardly contain myself. An exciting picture of Britain's loneliest telephone box.

▲ Much blubbering in evidence as Jazza, who apparently cooked all the meals, prepares onions for the thrilling and highly sophisticated evening meal - steak, potatoes and onions.

▲ Jaz regresses to monkey mode...

▲ The crew (and Richard's tongue) hang out at Devil's Bridge near Abergwyth.

▼ Boy, could I tell you some horror stories about that rented Granada Scorpio...

▲ Rad and Editor of MEGATECH magazine Paul Glancey indulge in washing up related merriment and hi-links.
